## TEXTBOOK

**Digital Sociology**

**Deborah Lupton**

New digital media technologies have had a profound influence on everyday life and social relations for many people in developed societies, and increasingly in developing societies. This book includes many examples of how digital technologies are incorporated into everyday life by users, from social media platforms such as Twitter to technologies used by companies for the surveillance and the monitoring of consumer habits. It locates the apparently 'new' field of digital sociology within its intellectual tradition, showing the trajectory of theory and research from the days of cyber theory beginning in the 1980s until the present moment of theorising and researching 'the digital'.

## 3rd Edition · TEXTBOOK

**Environmental Sociology**

**John Hannigan**, University of Toronto, Canada

The third edition of John Hannigan's classic undergraduate text has been fully updated and revised to highlight contemporary trends and controversies within global environmental sociology. *Environmental Sociology* offers a distinctive, balanced treatment of environmental issues, reconciling Hannigan's much-cited model of the social construction of environmental problems and controversies with an environmental justice perspective that stresses inequality and toxic threats to local communities.

## TEXTBOOK

**Gender: The Basics**

Hilary Lips, Radford University, USA

Series: *The Basics*

Explaining what gender is and how it interacts with concepts of power and inequality, this text takes a global perspective, looking at the intersections between gender, age, sex, race and class across a broad range of topics including: relationships, intimacy and concepts of sexuality; the workplace and labour markets; gender related violence and war; public health, poverty and development.

With examples and suggestions for further reading throughout, this text offers a perfect blend of theory and application for all those beginning a course in the field of gender, and those in related social science disciplines looking to learn more about a

topic which is ever present in everyday contexts.

## TEXTBOOK

**Fashion Theory**

An Introduction

Malcolm Barnard, University of Loughborough, UK

*Fashion Theory: An Introduction* explains some of the most influential and important theories on fashion: it brings to light the presuppositions involved in the things we think and say about fashion everyday and shows how they depend on those theories. This clear, accessible introduction contextualises and critiques the ways in which a wide range of disciplines have used different theoretical approaches to explain – and sometimes to explain away – the astonishing variety, complexity and beauty of fashion.

## STUDENT REFERENCE

**Gender: The Key Concepts**

Edited by Mary Evans, University of Kent, UK and Carolyn Williams, Gender Institute, London School of Economics, UK

Series: *Routledge Key Guides*

This invaluable volume provides an overview of over forty terms, theories and concepts frequently used in gender studies. Each entry provides a critical definition of the concept, examining its background, its usage and the major figures associated with it. Taking a truly interdisciplinary and global view of gender studies, concepts covered include: agency; diaspora; heteronormativity; feminist politics.

With cross referencing and further reading throughout, *Gender: The Key Concepts* unweaves the relationships between different

aspects of the field, and is essential for all those studying gender in interdisciplinary contexts as undergraduates, postgraduates and beyond.

## TEXTBOOK

**Fat**

Deborah Lupton, University of Sydney, Australia

Series: *Shortcuts*

Despite the fact that in many western countries overweight bodies outnumber thin bodies, fat people are still socially marginalised and treated with derision and even repulsion. *Fat* examines the issues around the social, cultural and political aspects of fatness in order to make sense of the symbolic meanings which surround it. The book is a concise and fascinating introduction that will appeal both to students and to general readers.

## 4th Edition · TEXTBOOK · NEW EDITION

**Sexuality**

Jeffrey Weeks, London South Bank University, UK

Series: *Key Ideas*

The fourth edition of *Sexuality* displays the qualities which have made this book a key text for understanding human sexuality. Framing the analysis is an acute understanding of the world-wide changes that are remaking sexuality and gender, dramatized by the globalization of sex, and the rise and rise of cybersex. The significance of agency in reshaping sexual and intimate life is symbolized by the controversies over same-sex marriage. These in turn feed into debates about intimate citizenship and human sexual rights in a rapidly changing world.

**Sexuality: The Basics**

Kari Lerum, University of Washington-Bothell, USA

Series: *The Basics*

An introductory guide to the diverse and ever changing field of sexuality studies and its intersection with gender, women's and queer studies. Drawing on the humanities, social sciences and health sciences, this text examines the key concepts and issues within this field of study, answering important questions including:

What is sexuality about and how do we define it? In what ways can we study human sexuality? How does sexuality intersect with other aspects of identity?

Providing an accessible map and overview of the subject, this book is ideal reading for anyone beginning a course in the fields of sexuality and gender studies, and those in related social science and humanities disciplines looking to learn more about an issue which is central to social life.

## Social Sciences

The Big Issues

**Kath Woodward**, The Open University, UK

*Social Sciences: The Big Issues* third edition looks at what matters in terms of what is changing and what remains the same in contemporary life, bringing together personal concerns and social forces. Fully revised and updated, this book explores some of the debates about how we live our personal, domestic and emotional lives at a time of change and disruption, including economic crises and uncertainties. The issues covered include: changing selves and personal lives; the role of consumption and consumerism; materialism and material culture; as well as citizenship, migration and globalization as both opportunities and sources of inequality in the contemporary world and in everyday lives.

## Sociology, Work and Organisation

7th edition

**Tony Watson**, University of Nottingham, UK

*Sociology, Work and Organisation* deftly combines discussion of the theories and methods of sociology with consideration of an outstanding range of substantive issues relevant to contemporary work contexts and environments. The new edition boasts stronger coverage of historical and contemporary changes to, and patterns of, work organisation; a sharper focus on inequality; and a clearer narrative line culminating in a new final chapter. With its wealth of pedagogic features, crystal-clear prose and intellectual rigour, this brilliant textbook is ideally suited for teaching and study.

## 4th Edition · TEXTBOOK

**Theories of the Information Society**

Frank Webster, City University, London, UK

Series: *International Library of Sociology*

Where once economies were built on industry and conquest, we are now part of a global information economy. The fourth edition of this classic study brings it up to date with new research and with social and technological changes – from the 'Twitter Revolutions' of North Africa, to financial crises that introduced the worst recession in a lifetime, to the emergence of social media and blogging – and reassesses the work of key theorists in light of these changes. More outspoken than previous editions, this interdisciplinary book is essential reading for those trying to make sense of social and technological change in the post-war

era.
