

ROUTLEDGE

Built Environment, Sustainability and Geography Catalogue 2022

January - June

New and Forthcoming Titles

Welcome

Welcome to the January to June 2022 Built Environment, Sustainability and Geography Catalogue.

We welcome your feedback on our publishing programme, so please do not hesitate to get in touch – whether you want to read, write, review, adapt or buy, we want to hear from you, so please visit our website below or please contact your local sales representative for more information.

www.routledge.com

Prices are correct at time of going to press and may be subject to change without notice. Some titles within this catalogue may not be available in your region.

eBooks

We have over 50,000 eBooks available across the Humanities, Social Sciences, Behavioural Sciences, Built Environment, STM and Law, from leading Imprints, including Routledge, Focal Press and Psychology Press. These eBooks are available for both individual and institutional purchase.

INDIVIDUALS

Our eBooks are available from Amazon, Apple iBookstore, Google eBooks, Ebooks.com, Kobo, Barnes & Noble, Waterstones, Mobipocket, VitalSource, and CourseSmart.

LIBRARIES AND INSTITUTIONS

Subscribe to or purchase a wide range of eBook packages or pick and mix your own from our complete collection (a minimum number of titles applies). FREE TRIALS are available. For more information, please visit www.tandfebooks.com or contact your local sales team.

eUpdates

Register your email at www.tandf.co.uk/eupdates to receive information on books, journals and other news within your area of interest.

Partnership Opportunities at Routledge

At Routledge we always look for innovative ways to support and collaborate with our readers and the organizations they represent.

If you or your organization would like to discuss partnership opportunities, from reciprocal marketing activities to commercial enterprises, please do get in touch on partnerships@routledge.com.

Considering Books for Course Use?

This symbol shows books that are available as complimentary exam copies for lecturers or faculty considering them for course adoption. To obtain your copy visit the URL listed beneath the title in the catalog and select your choice of print or electronic copy.

Visit www.routledge.com or in the US you can call 1-800-634-7064.

This symbol shows books that are available as electronic inspection copies only.

Trade Customers' Representatives, Agents and Distribution

Appropriated Interiors

Edited by **Deborah Schneiderman**, Pratt Institute, USA, **Anca I. Lasc**, Associate Prof., Pratt Institute and **Karin Tehve**, Pratt Institute, USA

Appropriated Interiors uncovers the ways interiors participate explicitly and implicitly in embedded cultural and societal values and explores timely emergent scholarship in the fields of interior design history, theory and practice.

An informative read for students and scholars of design history and theory, this collection considers the standards, assumptions, codes and/or conventions that need to be dismantled and how we can expand our understanding of the history, theory and practice of interior design to challenge the status quo.

Architectural Education Through Materiality

Pedagogies of 20th Century Design

Edited by **Elke Couchez** and **Rajesh Heynickx**

This book brings together a collection of illustrated essays dedicated to exploring the complex processes that transformed architecture's pedagogies in the 20th century. Presenting illustrated case studies of works by architects, educators and theorists including Dalibor Vesely, Dom Hans van der Laan, Alessandro Mendini, Heinrich Wölfflin, Alfons Hoppenbrouwers, Joseph Rykwert, Pancho Guedes and Robert Cummings, and, focusing on student-led educational initiatives in the UK, North America and Australia, the book will inspire students, educators and professionals with an interest in the many ways architectural knowledge is produced and taught.

Architectural Structures

Visualizing Load Flow Geometrically

Edmond Saliklis

Architectural Structures presents an alternative approach to understanding structural engineering load flow using a visually engaging and three-dimensional format. This book presents a groundbreaking new way of establishing equilibrium in architectural structures using the Modern Müller-Breslau method. Hundreds of detailed drawings created by the author are included throughout to aid understanding. A detailed, yet approachable guide, the book is ideal for students of architecture, construction management, and structural engineering, at all levels. Practitioners will find the method extremely useful for quickly solving load tracing problems in three-dimensional grids.

Architectural Terra Cotta

Design Concepts, Techniques and Applications

Donald B. Corner, University of Oregon, Eugene, Oregon, USA and **John Rowell**

Architectural Terra Cotta examines the evolution of terra cotta and prepares architects and builders to make new, creative uses of the timeless material.

With over 150 color images, this volume provides a concise resource for all those considering terra cotta as a façade system: architects, façade engineers, cladding subcontractors, materials suppliers, developers, and prospective clients. With inspiring examples of expressive possibility, this invaluable book will find a home with students and professionals alike interested in making rich, colorful, and durable buildings.

Architectural Type and Character

A Practical Guide to a History of Architecture

Samir Younés and **Carroll Westfall**

Architectural Type and Character: A Practical Guide to a History of Architecture provides an alternative perspective to the current role given to history in architecture, reunifying architectural history and architectural design to reform architectural discourse and practice. This is an excellent desk reference and studio guide for students and architectures alike to understand, analyze and create buildings.

Architecture and Collective Life

Edited by **Penny Lewis**, University of Dundee, UK, **Lorens Holm**, University of Dundee, Scotland and **Sandra Costa Santos**, Northumbria University, UK

Series: Critiques

Written by an international range of contributors the chapters address the intersection of public life and the built environment around the themes of authority and planning, the welfare state, place and identity and autonomy. The book covers a diverse range of material from Foucault's evolving thoughts on space to land-scraping leisure centres in Post-War Belgium. It unpacks concepts such as 'community' and 'collectivity' alongside themes of self-organisation and authorship. As such it will be of great

interest to students and academics in architecture and urbanism as well as practicing architects.

Architecture in Development

Systems and the Emergence of the Global South
Edited by **Aggregate Architectural History Collaborative**

This extensive text investigates how architects, planners, and other related experts responded to the contexts and discourses of "development" after WWII. This book sets out to examine the arrays of power, resources, technologies, networking, and knowledge that cluster around the term of development, and the manner in which architects and planners negotiated these thickets in their multiple capacities, as knowledge experts, as technicians, as negotiators, and as occasional authorities on settlements, space, domesticity, education, health, and every other field where arguments for development were made.

Architecture of Threshold Spaces

A Critique of the Ideologies of Hyperconnectivity and Segregation in the Socio-Political Context

Laurence Kimmel, University of New South Wales, Australia
Series: Routledge Research in Architecture

Building on an existing body of literature, the book engages with critical philosophy and discusses how it can be applied to architecture. In a similar vein to Walter Benjamin's descriptions of the Parisian Arcades in the 19th century, the book identifies the conditions under which thresholds reveal and impact social life. It utilises a wide range of illustrated international case studies from architects in Japan, Norway, Finland, France, Portugal, Italy, USA, Australia, Mexico, and Brazil. Within the examples, thresholds become enhancers of social interactions and highlight broader socio-political contexts in public and private space.

Architecture, Aesthetics, and the Predicaments of Theory

Amir H Ameri

Series: Routledge Research in Architectural History

Architecture, Aesthetics, and the Predicaments of Theory offers a critical analysis of the methodological constants and shared critical strategies in the history of theoretical discourse on Western architecture.

The book will interest scholars and students of architecture, architectural history and theory, as well as scholars and students of cultural studies, aesthetic philosophy, art history, literary criticism, and related disciplines.

Building Meaning

An Architecture Studio Primer on Design, Theory, and History
Tamara Metz

Building Meaning: An Architecture Studio Primer on Design, Theory, and History is an essential introduction to the complex relationship between form making, historical analysis, and conceptual explorations.

The ideal book for beginning and intermediate architecture students, it gives specific methods to apply in the studio to make the most of the design process, as well as focused exercises to creatively explore each concept presented. Illustrated with over 200 color images, it enables readers to engage and understand critically the genesis of architectural ideas and their role in our social and cultural experience.

Building Theories

Architecture as the Art of Building

Franca Trubiano, University of Pennsylvania, USA

This book explores significant and timely topics for both the design and construction of contemporary architecture by challenging its very practice of theory. It proposes an alternative definition of architectural theory; one that is able and willing to confront the many contradictions now faced by designers, architects, engineers, and builders who negotiate often overwhelming technological imperatives. It valorises the, as yet, untapped potential of thinking through building, preparing the foundations for a critical return to the art of making that is architecture.

Collaborations in Architecture and Engineering

Clare Olsen, California Polytechnic State University, San Luis Obispo, USA and **Sinead Mac Namara**, Syracuse University, New York, USA

This new edition of *Collaborations in Architecture and Engineering* explores how to effectively develop creative collaborations among architects and engineers. The authors, an architect and an engineer, share insights gained from their experiences and research on fostering productive communication, engaging in interdisciplinary discussions, and establishing common design goals.

The second edition of *Collaborations in Architecture and Engineering* is a terrific sourcebook for students, educators and professionals interested in integrative design practice among the disciplines.

Comprehensive and Integrative Architectural Design

Julius J. Chiavaroli

Comprehensive and Integrative Architectural Design addresses integrative design – design that bridges the gap between architectural design and architectural technology.

The book provides architecture students and faculty a definitive resource to assist them in executing an integrative solution to an architectural project. There are literally thousands of decisions that must be made when designing a building, from pre-design to schematic design to design development. With over 150 color illustrations, this text provides a framework for both instructors and students.

Design for Social Innovation

Case Studies from Around the World

Edited by Mariana Amatullo, Bryan Boyer, Jennifer May and Andrew Shea

Grounded by a global survey in sectors as diverse as public health, urban planning, economic development, education, humanitarian response, cultural heritage, and civil rights, *Design For Social Innovation* captures these stories and more through 45 richly illustrated case studies from six continents.

Design For Social Innovation is a must-have for professionals, organizations and educators in design, philanthropy, social innovation and entrepreneurship. This book marks the first attempt to define the contours of a global overview that showcases the cultural, economic, and organizational levers

propelling design for social innovation forward today.

Designing Coffee Shops and Cafés for Community

Lisa K. Waxman

This book brings together research, theory and practical applications for designing coffee shops and cafés as places to enhance community connections. Addressing societal trends, environment and behavior theories, place attachment, branding, authenticity, location, layout, and ambiance, the book provides guidelines to help designers and operators create more welcoming third places. Its practical design guidelines cover location, accessibility, seating, lighting, sound and more. Written for students, academics and designers, this book discusses the value of coffee shops and cafés and guides readers through the ways to create a place of belonging that brings people together.

Ecologies of Inception

Design Potentials on a Warming Planet

Simone Ferracina, University of Edinburgh, UK

Responding to increasing levels of planetary pollution and environmental collapse, this book re-thinks potentiality—an object's ability to change—in architecture and design. The book problematizes the still-prevailing modern paradigm of design practice: the technical tabula rasa, a tendency to begin from scratch and use raw and obedient materials that can be easily manipulated, facilitating a seamless and faithful embodiment of intentions. Instead, the philosophy of design developed in the text prompts—through a variety of case studies, thinkers, and disciplines—a collective reconsideration of value, dissociating it from the projects and signatures of any one author

or generation.

Husserl and Spatiality

A Phenomenological Ethnography of Space

Tao DuFour, Department of Architecture, College of Architecture, Art, and Planning, Cornell University, Ithaca, NY, USA.

Series: Routledge Research in Architecture

Husserl and Spatiality is an exploration of the phenomenology of space and embodiment, based on the work of Edmund Husserl.

The book's profoundly interdisciplinary approach makes an incisive contribution relevant to academics and students of architecture and architectural theory, anthropology and material culture, and philosophy and environmental aesthetics.

Jørn Utzon and Transcultural Essentialism

Adrian Carter, Bond University, Australia and Marja Sarvimäki, Bond University, Australia

Series: Routledge Research in Architecture

This book introduces and defines the burgeoning concepts of transculturalism and essentialism and how they relate to one another, as articulated with reference to the work of Jørn Utzon. It introduces critical contemporary perspectives of the design thinking and career of this renowned Danish architect, internationally recognised for his competition-winning, iconic design for the Sydney Opera House. The volume includes numerous previously unpublished photographs and interviews with Utzon's family members, former students and colleagues, offering a significant contribution to the existing body of

knowledge for any architecture scholar interested in Utzon's work and design principles.

Latour for Architects

Albenia Yaneva, University of Manchester, UK

Latour for Architects is the first introduction to the key concepts and ideas of Bruno Latour that are relevant to architects. First, the book discusses critically how specific methods and insights from his philosophy can inspire new thinking in architecture and design pedagogy. Second, it explores examples from architectural practice and urban design, and reviews recent attempts to extend the methods of ANT into the fields of architectural and urban studies. Third, the book advocates an ANT-inspired approach to architecture and examines how its methodological insights can trace new research avenues in the field, reflecting meticulously on its epistemological offerings.

7th Edition

Metric Handbook

Planning and Design Data

Edited by Pamela Buxton, Freelance Architecture and Design Journalist, UK

The *Metric Handbook* is the major handbook of planning and design data for architects and architecture students. Covering basic design data for all the major building types it is the ideal starting point for any project. For each building type, the book gives the basic design requirements and all the principal dimensional data, and succinct guidance on how to use the information and what regulations the designer needs to be aware of. Significantly revised in reference to changing building types and construction standards, new chapters on data centres and logistics facilities and sustainable design integrated into

chapters throughout. This book belongs in every design office.

LEED Lab

A Model for Sustainable Design Education

Patricia Andrasik, Catholic University of America, USA

LEED Lab: A Model for Sustainable Design Education was written to accompany LEED Lab, an international interdisciplinary collegiate laboratory course which utilizes campus buildings as demonstration sites to facilitate existing building green certification.

An excellent guide for undergraduate or graduate students enrolled in LEED Lab or a similar campus building assessment course, as well as construction or architectural professionals and facility managers, this manual navigates the complexities of using a green building diagnostic tool such as LEED O+M towards greater environmental literacy.

Mexico City's Zócalo

A History of a Constructed Spatial Identity

Benjamin A. Bross

Series: *Routledge Research in Architectural History*

This book presents a case study of one of Latin America's most important and symbolic spaces, the Zócalo in Mexico City, weaving together historic events and corresponding morphological changes in the urban environment. It poses questions about how the identity of a place emerges; how it evolves and, why does it change? *Mexico City's Zócalo: A History of a Constructed Spatial Identity* utilizes the history of a specific place, the Zócalo (Plaza de la Constitución), to explain the emergence and evolution of Mexican identities over time. It will be a fascinating read for architectural and urban historians investigating Latin America.

Mapping in Architectural Discourse

Place-Time Discontinuities

Marc Schoonderbeek, Delft University of Technology, Netherlands

Series: *Architectural Borders and Territories*

This book explores the notion of mapping in architectural discourse. Firstly locating, positioning and theorising mapping, it then makes explicit the relationship between research and design in architecture through cartography and spatial analysis. It proposes three distinct modalities: tool, operation and concept, showing how these methods lead to discursive aspects of architectural work and highlighting mapping as an instrument in developing architectural form. An investigation into architectural discourse, this book will appeal to academics and researchers within the discipline with a particular interest in

theory, history and cartography.

Microalgae Building Enclosures

Design and Engineering Principles

Kyoung-Hee Kim

Microalgae Building Enclosures: Design and Engineering Principles aims to provide design, engineering, and biotechnical guidelines for microalgae building enclosures that need to be considered for symbiotic relations among the built environment, humans, and ecosystems.

As one of the first books to comprehensively cover this emerging area of microalgae building enclosures, *Microalgae Building Enclosures* is an essential source for professionals and students looking to expand architectural discourse on nature integrated building systems to achieve the triple bottom line of sustainability.

Modern Apartment Design

Edited by **Guy Marriage**, Victoria University of Wellington, New Zealand

The book provides guidelines to the design of modern apartment buildings as well as a summation of current cutting-edge practice in engineered timber construction. It covers a brief history of apartment buildings around the world, a broad outline of different types of apartment blocks, and a strong focus on the design and actual construction of apartment buildings. It also features six Case Study chapters from industry-leading practitioners in the area, enabling best practice in architecture and engineering of these new apartment building types to be more widely understood and propagated worldwide.

The book will be of great interest to architects and architecture students.

Nature through a Hospital Window

The Therapeutic Benefits of Landscape in Architectural Design

Shan Jiang

Series: Health and the Built Environment

Adopting an evidence-based approach, this book uses two state-of-the-art experimental studies to explore nature's therapeutic benefits in healthcare environments, emphasizing how windows and transparent spaces can strengthen people-nature interactions. High-quality, supportive, and patient-centred healthcare environments are a key priority for healthcare designers worldwide, with ageing populations creating a demand for remodelled and updated facilities.

Poetics of Underground Space

Architecture, Literature, Cinema

Antonello Boschi, University of Pisa, Italy

This book investigates the relationship architecture has with the underground. It provides a broad ranging historical and theoretical survey of, and critical reflection on, ideas pertaining to the creation and occupation of underground space. It overturns the classic dictates of construction on the surface and through numerous examples explores recoveries of existing voids, excavations, caves, quarries, grottos and burrows. The book will appeal to architecture students, scholars and academics as well as those with an interest in literary theory, cinema, and cultural studies.

Programming for Health and Wellbeing in Architecture

Edited by **Keely Menezes**, **Pamela de Oliveira-Smith** and **A. Vernon Woodworth**

Programming for Health and Wellbeing in Architecture presents a new approach to architectural programming that includes sustainability, neuroscience and human factors.

This book expands the scope of the programming process and provides essential guidance for sustainable practice and the advancement of wellbeing in the built environment for architecture and interiors students, practitioners, instructors and academics.

Radical Functionalism

A Social Architecture for Mexico

Luis E. Carranza

Series: Routledge Research in Architecture

Radical Functionalism: A Social Architecture for Mexico provides a complex and nuanced understanding of the functionalist architecture developed in Mexico during the 1930s.

Uniquely including translations of two manifesto-like texts by O'Gorman expressing the polemical nature of their investigations, this book will be a useful reference for scholars, researchers and students interested in the history of architectural movements.

Residential Architecture as Infrastructure

Open Building in Practice

Edited by **Stephen H. Kendall**, Ball State University, USA

Series: Open Building

This edited collection provides an up-to-date account, by a group of globally positioned authors, of recently implemented projects, public policies and business activities in Open Building around the world. The book argues that the 'open building' approach is essential for the reactivation of the existing building stock for long-term value. It discusses these developments in residential architecture from the perspective of an infrastructure model of built environment. This model enables decision-makers to manage risk and uncertainty, while avoiding a number of problems often associated with large, fast-moving projects. Aimed at architects, urban designers, researchers and

policy-makers.

Rethinking Global Modernism

Architectural Historiography and the Postcolonial

Edited by **Vikramaditya Prakash**, University of Washington, Seattle, USA, **Maristella Casciato**, Getty Research Institute, USA and **Daniel E. Coslett**, Western Washington University, USA

This anthology collects developing scholarship on modernism that outlines a new decentred history of global modernism in architecture using postcolonial and other related theoretical frameworks. Its chapters explore the historiography and weaknesses of modernism's normative interpretations and propose alternatives to them. The collection offers essays that interrogate transnationalism in new ways, reconsiders the agency of the subaltern, and the roles played by infrastructures, materials,

and global institutions in propagating a diversity of modernisms internationally. Issues such as colonial modernism, architectural pedagogy, cultural imperialism, and spirituality are engaged.

Routledge Handbook of Resilient Thermal Comfort

Edited by **Fergus Nicol**, **Hom Bahadur Rijal** and **Susan Roaf**

Series: Routledge International Handbooks

This book brings together some of the finest academics in the field to address the important questions around the way in which people experience their physical environments including temperature, light and acoustics. It is of importance not only to the comfort people feel with their environment, but also the success of any building as an environment for its stated purpose. Crucially it also has a profound effect on the energy use of the building and its resilience to the increasing danger of extreme weather caused by climate change. This book heralds workable solutions and emerging directions for a key field in building the resilience of households, organisation and populations.

Space, Structures and Design in a Post-Pandemic World

Thomas Fisher

Pandemics have long-term effects on how we live and work, and the COVID-19 pandemic was no exception, accelerating us into a digital economy, in which people increasingly work, shop, and learn online, transforming how we use space in-person and remotely. *Space, Structures, and Design in a Post-Pandemic World* explores the rebalancing of our physical and digital interactions and what it means for the built environment going forward.

The Architect and the Academy

Essays on Research and Environment

Dean Hawkes

Series: Routledge Research in Architecture

This book presents an expansive overview of the development of architectural and environmental research, with authoritative essays spanning Dean Hawkes' impressive 50-year academic career. It considers the relationship between the technologies of environment and wider historical and theoretical factors, with chapters on topics ranging from the origins of modern 'building science' in Renaissance England to technology and imagination in architecture. It includes numerous architectural examples from the renowned architects such as Christopher Wren, Peter Zumthor, Alvar Aalto, Robert Venturi and Carlo Scarpa.

The Architectural Imagination at the Digital Turn

Nathalie Bredella

Series: Routledge Research in Design, Technology and Society

This book critically examines the long-held belief that the curvilinear styles and spectacular forms of architecture in the 90s was an aesthetic shaped by newly available digital technologies. It takes a closer look at what was happening behind the scenes, examining the economic, social, and material context behind some of the 90s' key architectural projects. Using selected case studies, drawn primarily from the US and Europe, the book dispels some of the mystique around these projects and considers the work of architects Bernard Cache, Greg Lynn and Lars Spuybroek. It offers scholars and students fresh insights into how architecture can engage with the digital realm today.

The Art of Enterprise

Entrepreneurship in Design

Nathan Richardson

The Art of Enterprise: Entrepreneurship in Design explores the form and nature of entrepreneurship in a range of creative disciplines. It explores the complex ecology of activities that enable design, entrepreneurship, and alternative methods of practice within a creative practice, and for the benefit and engagement of society.

With open-ended set of activities, charts, worksheets, and discussion questions, *The Art of Enterprise* fosters entrepreneurial thinking in formative projects and practices for students, academics and professionals.

The Digital Bespoke?

Promises and Pitfalls of Mass Customization

ginger coons, UWE Bristol, UK

Series: *Routledge Research in Design, Technology and Society*

The Digital Bespoke? is about mass customization, 3D printing, human bodies and the step towards digitally-built objects made to individual specifications. Using case studies of historical and current practices from Europe, Africa, and North America to ground her theory, she interrogates where digital fabrication technologies have developed from and how their uses differ from existing modes of production. Written for a scholarly audience and design practitioners, this book will be a useful reference point for students and researchers in digital and analogue design, technology and material culture.

The Routledge Companion to Architectural Drawings and Models

From Translating to Archiving, Collecting and Displaying

Edited by **Federica Goffi**, Carleton University, Canada

Series: *Routledge International Handbooks*

Expanding on the well-established discussion of the translation from drawings to buildings, this book fills a lacuna in current scholarly publications, questioning the significance of the lives of drawings and models after construction.

Including emerging, well-known and world-renowned scholars in the fields of architectural history and theory and curatorial practices, the 35 contributions define recent research in four key areas: Drawing Sites/Sites of Knowledge Construction; The Afterlife of Drawings and Model; Architectural Representations and their Apparatus Over Time; and The Ethical Responsibilities

of Collecting and Archiving.

The Routledge Companion to Contemporary Architectural History

Edited by **Duanfang Lu**, The University of Sydney, Australia

The *Routledge Companion to Contemporary Architectural History* features twenty-nine chapters written by leading architectural historians that define and shape future research, practice, and education.

The diverse contributions recognize multiple spatial rationalities and incorporate cross-cultural frameworks in studying the competing claims of architectural modernity. Illustrated with over 125 black and white images, this volume offers scholars, students and practitioners an evaluation of current and emerging approaches to architecture.

The Urbanism of Metabolism

Visions, Scenarios and Models for the Mutant City of Tomorrow

Edited by **Raffaele Pernice**, UNSW, Australia

This edited book explores and promotes reflection on how the lessons of Metabolism experience can inform current debate on city making and future practice in architectural design and urban planning. The essays are written by experienced scholars and renowned academics from Japan, Australia, Europe, S. Korea and the US and expose Metabolism's special merits in promoting new urban models and evaluate the current legacy of its architectural projects and urban design lessons. They offer a critical, intellectual, and up-to-date account of the Metabolism projects and ideas in the context of current evolution of architectural and urbanism discourse in a global context.

William Lethaby, Symbolism and the Occult

Amandeep Kaur Mann

Series: Routledge Research in Architectural History

This book delves into the life and work of architect William Richard Lethaby (1857 – 1931) and his relationship with the occult and alchemy, in particular. Using detailed analysis of Lethaby's drawings and architecture, the research uncovers Lethaby's familiarity with occult concepts and ideology during the spiritual revolution of the 19th century. *William Lethaby, Symbolism and the Occult* is written for upper-level students, researchers and academics interested in architectural history, William Lethaby and 19th century culture and society.

Design Studio Vol. 3: Designs on History

The Architect as Physical Historian

Edited by Jonathan Hill

Each architectural design is a new history. To identify what is novel or innovative, we need to consider the present, past and future. We expect historical narratives to be written in words, but they can also be delineated in drawing, cast in concrete or seeded in soil. The aim of this volume is to understand each design as a visible and physical history. Historical understanding is investigated as a stimulus to the creative process, highlighting how architects learn from each other and other disciplines. This encourages us to consider the stories about history that

architects fabricate.

Design Studio Vol. 4: Working at the Intersection

Architecture After the Anthropocene

Edited by Harriet Harriss and Naomi House

Without environmental justice, there can be no social justice. This volume sets the table for inclusive architectural engagement during a time circumscribed by pandemic, climate change and inequality. An esteemed group of international voices amplify interactions involving sexism, racism, classism, homophobia, transphobia and environmental catastrophe, exploring how they inextricably linked. Without acknowledging the interconnectedness of these injustices, we will not find effective ways to halt the deepening crisis.

Design your life

An architect's guide to achieving a work/life balance

Clare Nash

Ten years ago, Clare Nash was struggling with a common problem: how to be an architect and still have a life. She created an innovative practice that is flexible and forward-looking, based around remote working and the possibilities offered by improving technology. Bursting with tips, ideas and how-tos on all aspects of designing a working life that suits you and your business, this book explains in clear and accessible language how to avoid the common pitfalls of long hours and low pay. It explores how to juggle work with family commitments, how to set your own career path and design priorities, and how to instil a flexible working culture within a busy lifestyle.

Good Practice Guide

Professionalism at Work

Richard Brindley

With a focus on professional judgement, this book is a personal guide on how to be a self-aware and successful practitioner, aspiring to best practice. It will give you the confidence to create meaningful industry connections and handle contractual disputes, insurance and negligence claims while maintaining a high standard of conduct. By paying attention to business planning, financial processes, good management and effective communication, it will help you to protect your practice's reputation and increase profitability and cashflow. Ultimately, it will enable you to not only avoid professional pitfalls but to benefit from positive working relationships.

Inside Information

The defining concepts of interior design

Sally Stone and Edward Hollis

Every built structure has an interior: whether it takes the rough form of a rudimentary shelter, the grey walls of a hospital or the finessed decoration of a one-off residence. We spend most of our time inside buildings. Shut your eyes and you will find yourself in your own interior. You will always be inside. Mastering the language, thinking and history of the interior is critical to understanding and designing spaces. This essential primer transcends the boundaries and genres that often define interiors, providing a comprehensive view of the concepts and vocabulary of interior design.

Revaluing Modern Architecture

Changing conservation culture

John Allan

The conservation of our architectural heritage is a long-running subject of debate. When do buildings become old enough to warrant special heritage status and protection? Who decides which buildings are historically significant enough to protect and conserve? And what does this mean for building users and owners, who might well be better served if their buildings were less authentic, but more comfortable and usable? Presenting a clear line of sight through these knotty problems, this book explores the conservation, regeneration and adaptive re-use of Modern architecture.

The Happy Design Toolkit

Architecture for Better Mental Wellbeing

Ben Channon

If you were to design a building that prioritises occupants' happiness, what would it look like? How would the materials, form and layout support healthy ways of living and working? Delving into the evidenced-based research on architecture and mental wellbeing, *The Happy Design Toolkit* helps you to create happier places. It explores how factors, such as lighting, comfort, control over our environments and access to nature, exercise and social interaction, can impact how we feel. Easy-to-understand tips include bringing nature into your developments with roof gardens and living facades and countering social isolation with communal areas that encourage chance interaction.

2nd Edition

Self-build

How to design and build your own home

Julian Owen

If you've ever dreamt of designing and building your own home, this book is for you. Anyone can be a self-builder – you can do so without ever having to lay a brick yourself. Self-built homes can also be more individual, better designed and more economical than buying from a developer. This book is designed for homeowners and self-builders, whether aspiring or on the brink of starting a project. It provides a jargon-free, step-by-step guide to the process of designing and building your own home, distilling all of the practical information needed to make your

dream house a reality.

Squeezing It In

Designing for compact spaces

Mary Leslie

In this jargon-free guide, Mary Leslie demonstrates how to design for compact living, proposing creative solutions that can be applied to a variety of settings. A versatile designer may be addressing a cramped studio flat one day and a dressing room for an international business traveller the next; this book provides inspiration and advice for every kind of small space, and every budget. Organised around the different areas of the home, *Squeezing It In* examines familiar problems and offers clever, immediately applicable ideas for making the best of pocket-sized spaces.

Farzad Pour Rahimian, University of Strathclyde, UK, Jack Steven Goulding, Northumbria University, UK, Sepehr Abrishami, University of Portsmouth, UK, Saleh Seyedzadeh and Faris Elghaish

This book provides in-depth results and case studies in innovation from actual work undertaken in collaboration with industry partners in Architecture, Engineering and Construction (AEC). Scientific advances and innovative technologies in the sector are key to shaping the changes emerging as a result of Industry 4.0. This book is a timely and relevant synthesis of a number of cogent subjects underpinning the paradigm shift needed for the AEC industry and is essential reading for all involved in the sector.

How the Global Industry Reshapes the World

Igor Martek, Deakin University - Australia

This book tells you everything you need to know about international construction: the companies, their markets, the types of projects they build, how they compete and operate, and how it affects us all. The insights provide guidance on how global construction companies develop competitive advantage and stay resilient in the face of a mercurial global economy. These lessons will be of interest to the student and manager alike.

People, Place and Property Rights

A Political Ethnography of Land in Molo, Kenya

Ulrika Kolben Waaranperä, Malmö University - Sweden
Series: *Routledge Complex Real Property Rights Series*

For more than a century, property rights to land in Molo in the Kenyan highlands have been subjected to diverse reforms and desires. Via a detailed political ethnography, Ulrika Kolben Waaranperä uncovers the heterodox notion of property rights that has emerged as land has been redistributed, settlement schemes established, electricity lines drawn, and electoral violence mobilized. The book makes an important contribution to the study of land and politics in Kenya and beyond by drawing attention to how conceptions of property rights are shaped by and constitutive of relations of belonging and authority.

Principles and Practice of Property Valuation in Australia

Edited by David Parker, University of South Australia

This book provides a clear outline of the key principles underlying property valuation and the current techniques and issues in the practice of valuation for the major sectors of the Australian real estate market. The most up to date valuation text for the Australian market, this book will appeal to both valuation practitioners and undergraduate/postgraduate students as well as to accountants, lawyers and professionals dealing with property valuation issues.

Quantity Surveying Practice

The Nuts and Bolts

Chung Wai Calvin Keung, Kam Lan Daisy Yeung and Sai On Cheung

Quantity Surveying Practice: The Nuts and Bolts is a practical guide to quantity surveying in building construction. This book focuses on the basic concepts underlying the technical aspects of quantity surveying and contains many worked examples together with useful figures and real-life cases to help readers digest and understand the essentials and become better professionals as a result. This is essential reading for students on quantity surveying and construction management programmes, as well as the APC candidates pursuing the professional quantity surveying pathway. It is also a useful reference for practicing quantity surveyors.

Quantity Surveyor's Pocket Book

Duncan Cartlidge, Construction Procurement Consultant, UK

Series: *Routledge Pocket Books*

The fourth edition of *Quantity Surveyor's Pocket Book* remains a must-have guide for students and qualified practitioners. Its focused coverage of the data, techniques and skills essential to the quantity surveying role makes it an invaluable companion for everything from initial cost advice to the final account stage. This text includes recommended formats for cost plans, developer's budgets, financial reports, financial statements and final accounts. This is the ideal concise reference for quantity surveyors, project and commercial managers, and students of any of the above.

Social Value in Practice

Ani Raiden, Nottingham Business School, Nottingham Trent University, UK and Andrew King, Soul Value Consultancy

Series: Social Value in the Built Environment

Social Value in Practice offers the reader a simple, accessible guide for considering, creating, and delivering social value in projects and within their organisation. The book connects social value to the global Sustainable Development Goals (SDGs) and presents an insight into the many and different practical ways in which individuals and organisations can make a positive impact towards resolving the 'people, planet and prosperity' agenda. This book is a must read for all those involved in

procuring, tendering, planning, designing, developing, funding, building, working in and managing the built environment.

Survey and Assessment of Traditionally Constructed Brickwork

Moses Jenkins, Historic Environment Scotland, UK

The principal aim of this book is to improve the survey and assessment of traditionally constructed brickwork. It aims to ensure that those who have a cause to survey and assess buildings constructed of traditional (pre-1919) brickwork have a well-developed, clear methodology for undertaking effective, comprehensive surveys. This book provides an invaluable resource to all those who survey and assess buildings which are constructed of brickwork. This includes building professionals such as architects, surveyors, engineers and those working in building conservation; but also, construction managers and students studying built environment disciplines.

Sustainable Urban Regeneration

Insights and Evaluation from a UK Housing Association

Kevin Dean, Claudia Trillo and Angela Lee

This book provides a deep insight into urban regeneration schemes and explores the parameters of what is deemed a sustainable development, before appraising existing schemes' evaluation models for the sustainable return on investment. This book provides a unique method of fully and sustainably evaluating housing-led urban regeneration schemes, useful for planners, strategic management, local authorities, housing associations, the construction industry and built environment students alike.

The Economics of Property and Planning

Future Value

Graham Squires

This book introduces the interlocking disciplines of property and planning to economic theory and practice. Unlike any other available textbook, *The Economics of Property and Planning* skilfully introduces the reader to the interplay between property and planning using an economic lens. Targeted disciplines for the book include Economics, Planning, Property, Construction, Geography, Environmental Management, Sustainability, Housing, Built Environment, Land Economy, Urban Studies, Regional Studies, and Public Policy.

Urban Economy

Real Estate Economics and Public Policy

Colin Jones

Urban Economy: Real Estate Economics and Public Policy analyses urban economic change and public policy in a more practical way than a typical urban economics book. The book has a distinctive framework that considers the underlying reasons, and the consequences of urban change for real estate investors and policy makers. The book includes chapter objectives, self-assessment questions, chapter summaries, learning outcomes, case studies, global data and statistics and is a new textbook for core courses in urban economics and real estate economics on global Real Estate, Planning and related degree courses.

Validity and Reliability in Built Environment Research

A Selection of Case Studies

Edited by **Vian Ahmed**, **Alex Opoku**, UCL, UK, **Ayokunle Olanipekun**, University of Wolverhampton, United Kingdom and **Monty Sutrisna**, Curtin University, Australia

This book aims to guide researchers who are engaged in social science and built environment research through the process of testing the reliability and validity of their research outputs following the application of different methods of data collection. The book will be a great asset to Masters and PhD students, as well as supervisors from different backgrounds who need a refresher on this key aspect of the research cycle.

Alvar Aalto and The Art of Landscape

Teija Isohauta

Series: Routledge Research in Landscape and Environmental Design

Alvar Aalto and The Art of Landscape captures the essence of the Finnish architect's landscape concept, emphasising culture and tradition, which characterised his approach to and understanding of architecture as part of the wider environment. From the forests of his youth to sights from his travels, Alvar Aalto (1898 – 1976) was influenced by outdoor landscapes. Throughout his career, he felt the need to shape the terrain and this became a signature of his architecture.

Building Cities to LAST

A Practical Guide to Sustainable Urbanism

Jassen Callender

Building Cities to LAST presents the myriad issues of sustainable urbanism in a clear and concise system, and supports holistic thinking about sustainable development in urban environments by providing four broad measures of urban sustainability: Lifecycle, Aesthetics, Scale, and Technology (LAST). These broad measures and infrastructures address the city as a whole and as a recognizable pattern of human activity and, in turn, increase the ability of cities – and the human race – to LAST. This book will find wide readership particularly among students and young practitioners in architecture, urban planning, and landscape architecture.

Building Rural Community Resilience Through Innovation and Entrepreneurship

Edited by Charlie French

Series: Community Development Research and Practice Series

Drawing from empirical analyses, case studies, and a synthesis of best practices, this book explores how innovation manifests itself in rural places and how it contributes to entrepreneurial development and resilience. Innovation in rural places may come about as a result of new forms of collaboration; policies that leverage rural assets and address critical service or product gaps, novel strategies for accessing financial capital; infusion of arts into aspects of community life; and cultivation of networks that bridge entrepreneurs, organizations, and institutions.

Care and the City

Encounters with Urban Studies

Edited by Angelika Gabauer, Sabine Knierbein, Nir Cohen, Henrik Lebuhn, Kim Trogal, Tihomir Viderman and Tigran Haas

Care and the City is a cross-disciplinary collection of chapters examining urban social spaces, in which caring and uncaring practices intersect and shape people's everyday lives.

By establishing links to various fields of knowledge, this book seeks to systematically introduce debates on care to the interconnecting fields of urban studies, planning theory, and related disciplines for the first time.

Climate Adaptation and Resilience Across Scales

From Buildings to Cities

Edited by Nicholas B. Rajkovich and Seth H. Holmes

Climate Adaptation and Resilience Across Scales provides professionals with guidance on adapting the built environment to a changing climate. This edited volume brings together practitioners and researchers to discuss climate-related resilience from the building to the city scale. This book highlights North American cases that deal with issues such as climate projections, public health, adaptive capacity of vulnerable populations, and design interventions for floodplains, making the content applicable to many locations around the world.

Co-Crafting the Just City

Tales from the Field by a Planning Scholar Turned Mayor

James A. Throgmorton

In this new book, former Iowa City Mayor and Professor Emeritus James A. Throgmorton provides readers a sense of what democratically-elected city council members and mayors in the United States do and what it feels like to occupy and enact those roles. He does so by telling a set of "practice stories" focusing primarily, but not exclusively, on what he, a tenured planning professor at the University of Iowa, experienced and learned as a council member from 2012 through 2019 and, simultaneously, as mayor from 2016 through 2019. The book proposes a practical, action-oriented theory about how city futures are being (and can be) shaped.

Hazard Mitigation Training for Vulnerable Communities

A K.A.P.S. (Knowledge, Attitude, Preparedness, Skills) Approach

Joy Semien and Earthea Nance

Series: *Disaster Risk Reduction and Resilience*

This book is designed to educate vulnerable communities, emergency practitioners, and disaster researchers to build up the social and physical capacity of communities to mitigate and adapt to disaster impacts using a bottom-up framework to integrate knowledge, attitude, preparedness, and skills (K.A.P.S.). The book is comprised of two main resources: a guidebook designed for instructors including researchers, practitioners and community leaders, and a workbook designed for residents living within multi-hazard communities. The K.A.P.S. training program will prove to be an important tool for community trainers and academics across a range of hazards and disasters.

Identity in Post-Socialist Public Space

Urban Architecture in Kiev, Moscow, Berlin, and Warsaw

Bohdan Cherkes and Józef Hernik

Series: *Routledge Research in Planning and Urban Design*

This book is a comparative analysis of the architecture of central public spaces of capital cities in Central and Eastern Europe during the period of their authoritarian and post-authoritarian development. The book addresses the process of shaping and restructuring historic centres of European capital cities of Kiev, Moscow, Berlin, and Warsaw, which developed under authoritarian regime conditions throughout the 20th century, and were characterised by ideological determinism and the influence of state ideology and politics on the architecture of public spaces.

Landscape Architecture for Sea Level Rise

Innovative Global Solutions

Edited by Galen Newman and Zixu Qiao

This book assesses and illustrates innovative and practical world-wide measures for combating sea level rise from the profession of landscape architecture. It is important for those located within the current or future floodplain considering sea level rise and those responsible for land use within these areas to strategically implement a series of integrated constructed and green infrastructure-based flood risk reduction mechanisms to adequately protect threatened areas. As a result, this book is beneficial to both academics and practitioners related to multiple design professions such as urban designers, planners, real estate developers, and landscape architects.

Lighting Design in Shared Public Spaces

Edited by Shanti Sumartono

This book advocates an approach to lighting design that focuses on how people *experience* illumination. *Lighting Design in Shared Public Spaces* contextualizes light, dark and lighting design within the settings, sensations, ideas and imaginaries that form our understandings of ourselves and the world around us. The chapters in this collection bring a new perspective to lighting design, arguing for an approach that addresses how lighting is experienced, understood and valued by people

Manhattan's Public Spaces

Production, Revitalization, Commodification

Ana Morcillo Pallarés

Series: Routledge Critical Studies in Urbanism and the City

Manhattan's Public Spaces: Production, Revitalization, Commodification analyzes a series of architectural works and their contribution to New York's public space over the past few decades.

Manhattan's Public Spaces invites reflection on the revitalization of the city's shared space from all dimensions. Beautifully illustrated in black and white, with over 50 images, this book will be of interest to scholars and students in architecture, planning and urban design.

Mapping Urban Spaces

Designing the European City

Edited by Lamberto Amistadi, Valter Balducci, Tomasz Bradecki, Enrico Prandi and Uwe Schröder

Mapping Urban Spaces illustrates how the characteristics that make life in medium-sized European cities pleasant and sustainable—accessibility, ease of travel, urban sustainability, social inclusiveness—can be traced back to the nature of that space. The case studies come from countries around Europe including Poland, Italy, Greece, Germany, and France, among others. The book will be of interest to students, scholars, and practitioners in architecture, urban planning, and landscape architecture.

Multisensory Landscape Design

A Designer's Guide for Seeing

Daniel Roehr, University of British Columbia, Canada

This is a textbook for design students, professionals, and educators to develop multisensory literacy. This book is the first of its kind, providing introductions on each of the five senses, along with exercises that demonstrate how to observe, record, and visualize them. It explores current design school pedagogy, and how we might imagine a more mindful way of teaching. The book is a foundational resource for students, professionals, and instructors to understand and ultimately create multisensory spaces that are inclusive for all. This book imagines a world where seeing is redefined in a way that encompasses all of the senses—not just the visual.

New Industrial Urbanism

Designing Places for Production

Tali Hatuka and Eran Ben-Joseph

New Industrial Urbanism explores the evolving and future relationships between cities and places of production, focusing on the spatial implications and physical design of integrating contemporary manufacturing into the city.

Moving the conversation beyond the reflexively-negative characterizations of industry, more than two centuries after the start of the Industrial Revolution, this book calls to re-consider the ways in which industry creates places, sustains jobs, and supports environmental sustainability in our cities.

Nurturing Mobilities

Family Travel in the 21st Century

Claire Maxwell, Miri Yemini and Katrine Mygind Bach

Series: Networked Urban Mobilities Series

Nurturing Mobilities employs new empirical material and an innovative theoretical framing to bring new clarity to why families travel today – and what happens when they do. Vitality, it examines the two biggest contemporary issues in global mobility: COVID-19, and climate change. The authors' theoretically inter-disciplinary approach delivers a full analysis of the apparently divergent processes that differentiate family travel along social class lines, yet also allow travel to play a core role in social mobility. This book is a vital resource for scholars and students studying mobility, globalisation, social class, and climate change engagement.

Outdoor Lighting for Pedestrians

A Guide for Safe and Walkable Places

Frank Markowitz

Outdoor Lighting for Pedestrians shows how outdoor lighting is important for pedestrians' safety, personal security, and comfort, with major impacts on street, path, and park aesthetics and neighborhood sense of place. This book is aimed primarily at practicing transportation planners and engineers, generalist urban planners, safety advocates and researchers, and university students. However, lighting designers and other professionals will also find it useful. It considers how lighting can be coordinated with other potential improvements to enhance the pedestrian environment for better walkability.

Planning Cities With Young People and Schools

Forging Justice, Generating Joy

Deborah L. McKoy, Amanda Eppley and Shirl Buss

Offering the overlooked but essential viewpoint of young people from low-income communities of color and their public schools, *Planning Cities with Young People and Schools* offers an urgently needed set of best practice recommendations for urban planners to change the status quo and reimagine the future of our cities for and with young people.

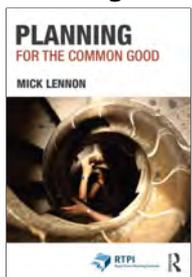

For academics, policy makers and practitioners, this book raises the importance of education systems and young people as critical to urban planning and the future of our cities.

Planning for the Common Good

Mick Lennox

Series: *RTPI Library Series*

This book proposes that the common good should not be conceived as something pre-existing and 'out there' to be identified and applied, or something simply produced through the correct configuration of democracy. Instead, it is contended that the common good must be perceived as something 'in here', which is known by engagement with the complexities of a context through employing the interpretive tools supplied to one by the moral dimensions of the life in which one is inevitably embedded.

2nd Edition

Qualitative Research Methods for Community Development

Robert Mark Silverman, University at Buffalo, New York, USA and Kelly L. Patterson, University at Buffalo, New York, USA

The second edition of *Qualitative Research Methods for Community Development* teaches the basic skills, tools, and methods of qualitative research with special attention to the needs of community practitioners.

From housing, community organizing, neighborhood planning, and urban revitalization, this book gives students the skills they need to undertake their own projects and provides professionals a valuable reference for their future research. *Qualitative Research Methods for Community Development* serves as a primary text for courses in applied qualitative research, and as a reference book for professionals and community-based researchers.

Representing Landscapes

One Hundred Years of Visual Communication

Edited by Nadia Amoroso, University of Toronto, Canada and Martin Holland

Series: *Representing Landscapes*

This volume provides an in-depth historical overview of graphic and visual communication styles, techniques and outputs from key landscape architects over the past century.

Representing Landscapes: One Hundred Years of Visual Communication offers a detailed account of how past and present landscape architects and practitioners have harnessed the power of visualization to frame and situate their designs within the larger cultural, social, ecological and political milieu. Richly detailed with over 220 illustrations, this work is a 'must-have' for those studying contemporary landscape design or those fascinated by the profession's history.

Shaping Holland

Regional Design and Planning in the Southern Randstad

Jeroen van Schaick, Francisco Colombo and Peter Paul Witsen

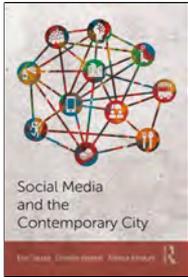

Shaping Holland gives a unique insight into the emergence of contemporary regional planning and design practice in the Netherlands. Amid the growing number of academic analyses of regional design, this book uniquely focuses on planning practice and first-hand knowledge, while also exposing the benefits and the pitfalls of regional plans and designs. Drawing on first-hand accounts and a rich collection of illustrations, maps and diagrams, the book gives pointers for practitioners, academics and students of spatial planning, urban design and landscape architecture.

Sustainable Smart City Transitions

Theoretical Foundations, Sociotechnical Assemblage and Governance Mechanisms

Edited by Luca Mora, Mark Deakin, Xiaoling Zhang, Michael Batty, Martin de Jong, Paolo Santi and Francesco Paolo Appio

This book enhances the reader's understanding of the theoretical foundations, sociotechnical assemblage, and governance mechanisms of sustainable smart city transitions. Focusing on different empirical settings, change dimensions, and analytical elements, the attention moves from the sociotechnical requirements of citywide transition pathways to the development of sector-specific smart city projects and technological innovations, in particular in the fields of urban mobility and urban governance.

The chapters in this book were originally published as a special issue of the *Journal of Urban Technology*.

Sustainable Infrastructure for Cities and Societies

Michael Neuman

Sustainable Infrastructure for Cities and Societies shows how fundamental planning, design, finance, and governance principles can be adapted for sustainable infrastructure to provide solutions to make cities significantly more sustainable. By providing a contemporary overview on infrastructure, cities, planning, economies, and sustainability, the book addresses how to plan, design, finance, and manage infrastructure in ways that reduce consumption and harmful impacts while maintaining and improving life quality. This approach gives the book wide appeal for students, researchers, and practitioners hoping to build a more sustainable world.

Sustainable Urban Futures in Africa

Edited by Michael Addaney and Patrick Cobbinah

Series: *Routledge Research in Planning and Urban Design*

Sustainable Urban Futures in Africa provides theoretical frameworks to inform understandings and responses to critical urban development issues such as urbanisation, climate change, housing/slum, informality, urban sprawl, urban ecosystem services and urban poverty within the context of the sustainable development goals in Africa.

It provides support for the SDGs in urban Africa, and will be of interest to students and researchers, professionals and policymakers, and readers of urban studies, spatial planning, geography, governance and other social sciences.

The Politics of Street Trees

Edited by Jan Woudstra and Camilla Allen

This book focuses on the politics of street trees and the institutions, actors and processes that govern their planning, planting and maintenance. This is an innovative approach which is particularly important in the context of mounting environmental and societal challenges and reveals a huge amount about the nature of modern life, of social change and political conflict. By pursuing an interdisciplinary approach this book produces an information base for academics, practitioners, politicians and activists alike, thus contributing to a fairer political debate that helps to promote more democratic environments that are sustainable, equitable, comfortable, and healthier.

Transformative Planning

Smarter, Greener and More Inclusive Practices

Edited by Christopher Silver, University of Florida, USA and Andrea I. Frank

Series: *Dialogues in Urban and Regional Planning*

The *Dialogues in Urban and Regional Planning* series offers a selection of some of the best scholarship in urban and regional planning from around the world with internationally recognized authors taking up urgent and salient issues from theory, to education for and practice of planning.

Transformative Planning offers provocative insights into the global planning community's struggle and contribution to tackle the major challenges to society in the 21st century. It will be of use for advanced undergraduate and graduate courses in the wide ranging fields encompassed by urban studies, sustainability studies, and urban and regional planning.

Transforming Public Space through Play

Gregor H. Mews

This book provides an empirical analysis of the concept of play as a form of spatial practice in urban public spaces. The introduced City Play Framework (CPF) is a practical urban analysis tool that allows urban designers, landscape architects and researchers to develop a shared awareness when opening up this window of possibility for adventure. Two case studies substantiate and illustrate the development process and testing of the framework in Canberra, Australia and Potsdam, Germany. A bridge between theory and practice, this book explores possibilities on what future design ought to be when openness and ambiguity are consciously integrated parts of practice and process.

Victorian Cemeteries and the Suburbs of London

Spatial Consequences to the Reordering of London's Burials in the Early 19th Century

Gian Luca Amadei

Series: *Routledge Research in Planning and Urban Design*

This book explores how Victorian cemeteries were the direct result of the socio-cultural, economic, and political context of the city, and were part of a unique transformation process that emerged in London at the time. The book shows how the re-ordering of the city's burial spaces, along with the principles of health and hygiene, were directly associated with liberal capital investments, which had consequences in the spatial arrangement of London.

Vienna

Still a Just City?

Edited by **Yuri Kazepov** and **Roland Verwiebe**

Series: *Built Environment City Studies*

This book explores and debates the urban transformations that have taken place in Vienna over the past 30 years and their consequences in policy fields such as labour and housing, political and social participation and the environment. It questions the city's resilience using time series and an institutional analysis of four key dimensions that characterize the European city model, within the context of post-industrial transition: redistribution, recognition, representation and sustainability. It offers a multiscale perspective of urban governance through labour, housing, participatory and environmental policies, bringing together different levels and

public policy types.

Why Cities Need Large Parks

Large Parks in Large Cities

Edited by **Richard Murray**

The large parks and green infrastructure presented here illustrate the diverse uses and many benefits of large urban parks across 30 major cities. At a time when we are seriously reconsidering how we live in cities and our urban quality of life, while also grappling with serious challenges of climate change, the authors of this book detail the much-needed evidence, pathways and vision for a future of more liveable, resilient cities where large urban parks are at the core. This book will help park managers, NGOs, landscape architects, and city planners to develop the green city of the future.

A Decolonial Black Feminist Theory of Reading and Shade

Feeling the University

Andrea N. Baldwin

Series: *Routledge Research on Decoloniality and New Postcolonialisms*

This book uses a Black feminist decolonial lens to understand the contemporary significance of the practices and politics of indifference in American higher education. It illustrates how higher education institutions are complicit in maintaining dominant social norms that perpetuate difference. It weaves together Black feminisms, affect and queer theory to demonstrate that the ways in which human bodies are classified and normalised in societal and scientific terms contributes to how the minoritized and marginalized feel White higher education spaces.

Animals in the City

Edited by Laura A. Reese, Michigan State University, USA

Series: *Global Urban Studies*

This book presents interdisciplinary research to examine the ongoing debates around non-human animals in urban spaces. It explores how we can better appreciate and accommodate animals in the city, while also exploring the ecological, health, ethical, and cultural implications of the same.

With global insights on human-animal relationships in a contemporary context, this book will be useful reading for scholars and students of urban studies, animal sciences, animal law, animals and public policy, anthropology and environmental studies interested in the study of animals in cities.

Atmospheres and Shared Emotions

Edited by Dylan Trigg

Series: *Ambiances, Atmospheres and Sensory Experiences of Spaces*

This book explores the role atmospheres play in shared emotion. With insights from leading scholars in the field, *Atmospheres and Shared Emotions* investigates key issues such as the relation between atmospheres and moods, how atmospheres define psychopathological conditions such as anxiety and schizophrenia, what role atmospheres play in producing shared aesthetic experiences, and the significance of atmospheres in political events.

Offering both a nuanced analysis of key terms in contemporary debates as well as a series of original studies, the book will be a vital resource for scholars in contemporary philosophy, aesthetics, human geography, and political science.

Borderlands Resilience

Transitions, Adaptation and Resistance at Borders

Edited by Dorte Jagetic Andersen and Eeva-Kaisa Prokkola, University of Oulu, Finland

Series: *Border Regions Series*

This book offers new insights into the current, highly complex border transitions taking place at the EU internal and external border areas, as well as globally. It focuses on new frontiers and intersections between borders, borderlands and resilience, developing new understandings of resilience through the prism of borders.

Compulsive Body Spaces

Diana N.M. Beljaars

Series: *Routledge Research in Culture, Space and Identity*

Compulsive Body Spaces presents a spatial understanding of compulsion. Providing a compelling account of the lives of 15 people with Tourette syndrome, it demystifies the seemingly irrational, purposeless and meaningless character of this behaviour.

This book will be of interest to students and scholars in science and technology studies, human geography, sociology, health and social care, medical humanities, continental philosophy and disability studies.

Crisis Urbanism and Postcolonial African Cities in Postmillennial Cinema

Edited by Addams Mututa, University of Cape Town, South Africa

Series: *Routledge Research on Decoloniality and New Postcolonialisms*

This book provides a framework to rethink postcoloniality and urbanism from African perspectives. Bringing together multidisciplinary perspectives on African crises through postmillennial films the book addresses the need to situate global south cultural studies within the region.

The book will be of interest to students and scholars of urban studies, urban geography, urban sociology, cultural studies and media studies.

Culture, Creativity and Economy

Collaborative Practices, Value Creation and Spaces of Creativity

Edited by **Brian J. Hraacs**, University of Southampton, UK, **Taylor Brydges**, **Tina Haisch**, **Atle Hauge**, **Johan Jansson** and **Jenny Sjöholm**

Series: The Dynamics of Economic Space

This book nuances our understanding of the contemporary creative economy by engaging with a set of three key tensions which emerged over the course of eight European Colloquiums on Culture, Creativity and Economy (CCE): 1) The tension between individual and collaborative creative practices, 2) The tension between tradition and innovation, and 3) The tension between isolated and interconnected spaces of creativity. This book will be of interest to students, scholars and professionals researching the creative economy, as well as

specific cultural and creative industries, across the humanities and social sciences.

Diplomatic Families and Children's Mobile Lives

Experiences of British Diplomatic Service Children from 1945 to 1990

Sara Hiorns

Series: Routledge Spaces of Childhood and Youth Series

This book is the first of its kind: a historical inquiry into the family life of British diplomats between 1945 and 1990. It examines the ways in which the British Diplomatic Service reacted to and were influenced by the radical social changes that took place in Britain during the latter half of the twentieth century. It asks to what extent diplomats, who strove to protect their enclosed and elite circles, were suitable to represent this changing nation. Offering new and fresh insights, this book will be of interest to students and scholars in history, historical geography, political studies, sociology, feminist studies and cultural studies.

Geography, Health and Sustainability

Gender Matters Globally

Edited by Allison Williams and Isaac Luginaah

Series: *Geographies of Health Series*

With a global commitment to achieve gender equality by 2030, the SDGs present a historic opportunity to place gender as central to human progress across the globe. Gender Equality, which requires the empowerment of all women and girls, is an explicit goal, in addition to being a fundamental prerequisite to and facilitator of most other SDGs. This edited collection provides a range of geographical and geospatial insights, from a variety of disciplinary and country-specific perspectives, to better understand gender and sustainable development. In addition to several African countries, Mexico, Japan, Canada, USA and Cambodia are featured.

Growth and Change in Post-socialist Cities of Central Europe

Edited by Waldemar Cudny and Josef Kunc

Series: *Routledge Contemporary Perspectives on Urban Growth, Innovation and Change*

This book presents multidimensional socio-economic transformations taking place in the post-socialist cities located in selected countries of the Central European region. The analysis includes case studies from the Eastern part of Germany (Chemnitz, Leipzig), Poland (Łódź, Kielce, Katowice conurbation, and peripheral urban centres from Eastern Poland), Slovakia (Bratislava, Nitra), Czech Republic (Olomouc, Brno), and from Hungary (Pécs). The book will be valuable to undergraduate and postgraduate students in human geography, urban studies, economy, and city marketing, especially with an interesting in Central Europe.

Hegemony, Security Infrastructures and the Politics of Crime

Everyday Experiences in South Africa

Gideon van Riet, North-West University, South Africa

Series: *Routledge Studies in Urbanism and the City*

This book examines the politics of crime and the response to it in Potchefstroom, a small settler colonial city in South Africa. It draws on the city's everyday practices and experiences of physical and virtual security to offer local bottom-up insights into private security.

With a novel analytical approach based on the twin optics of infrastructure and post-structural hegemony, the book will be relevant to scholars and students of South African politics and critical security studies, as well as international audience interested in crime and private security.

2nd Edition

Home

Alison Blunt, Queen Mary University of London, UK and Robyn Dowling, University of Sydney, Australia

Series: *Key Ideas in Geography*

Home articulates a 'critical geography of home' in which home is understood as an emotive place and spatial imaginary that encompasses lived experiences of everyday, domestic life alongside a wider, and often contested, sense of being and belonging in the world.

The significantly revised and updated second edition contains new research boxes, illustrations, contemporary examples, and a new chapter on 'Home and the City' that extends the scalar understanding of home to the urban. The book provides an understanding of home that is intended for academics and students across the humanities and social sciences.

Housing in Turkey

Policy, Planning, Practice

Edited by Ö. Burcu Özdemir Sari, Esma Aksoy Khurami and Nil Uzun

This book presents the major features of the path that Turkish housing system has followed since 2000. Its primary focus is to build an understanding of housing in Turkey from the policy, planning, and implementation perspectives in the 21st century, interwoven with the effects of neoliberalism. It investigates the social, spatial, and economic outcomes of the shift in philosophy and behaviour by the government regarding housing. The book discusses failures in housing outcomes as government failures, incorrect or inefficient regulations, lack of regulations, and lack of monitoring of the policy outcomes.

Mental Maps

Geographical and Historical Perspectives

Edited by Janne Holmén, Uppsala University, Sweden and Norbert Götz, Södertörn University, Sweden

The concept of mental maps is used in several disciplines including geography, psychology, history, linguistics, economics, anthropology, political science, and computer game design. However, until now, there has been little communication between these disciplines and methodological schools involved in mental mapping. This book addresses this situation by bringing together scholars from some of the related fields.

The chapters in this book were originally published as a special issue of the *Journal of Cultural Geography*.

Recalibrating the Quantitative Revolution in Geography

Travels, Networks, Translations

Edited by **Boris Michel, Ferenc Gyuris** and **Katharina Paulus**

Series: Routledge Research in Historical Geography

This book brings together international research on the quantitative revolution in geography. It offers perspectives from a wide range of contexts and national traditions that decenter the Anglo-centric discussions. The mid-20th century quantitative revolution is frequently regarded as a decisive moment in the history of geography, transforming it into a modern and applied spatial science. This book highlights the different temporalities and spatialities of local geographies laying the ground for a global history of a specific mode of geographical thought.

Routledge Companion to Cycling

Edited by Glen Norcliffe, Una Brogan, Peter Cox, University of Chester, UK, Boyang Gao, Tony Hadland, Sheila Hanlon, Tim Jones, Nicholas Oddy and Luis Vivanco

Series: *Routledge International Handbooks*

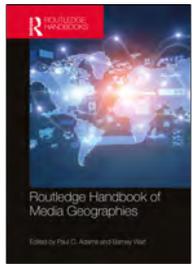

Routledge Companion to Cycling presents a comprehensive overview of an artefact that throughout the modern era has been a bellwether indicator of the major social, economic and environmental trends that have permeated society. The volume synthesizes a rapidly growing body of research on the bicycle, its past and present uses, its technological evolution, its use in diverse geographical settings, its aesthetics and its deployment in art and literature. From its origins in early modern carriage technology in Germany, it has generated what is now a vast, multi-disciplinary literature encompassing a wide range of issues in countries throughout the world.

Routledge Handbook of Media Geographies

Edited by Paul C Adams and Barney Warf, University of Kansas, USA

This Handbook offers a comprehensive overview of media geography, focusing on a range of different media viewed through the lenses of human geography and media theory. It addresses the spatial practices and processes associated with both old and new media.

Media geography is a burgeoning field of study that lies at the intersections of various social sciences, including human geography, political science, sociology, anthropology, communication/media studies, urban studies, and women and gender studies. Academics and students across these fields will

greatly benefit from this Handbook.

Social Protection and Informal Workers in Sub-Saharan Africa

Lived Realities and Associational Experiences from Tanzania and Kenya

Edited by Lone Riisgaard, Winnie V. Mitullah, University of Nairobi, Kenya and Nina Torm

Series: *The Dynamics of Economic Space*

Social protection policies and instruments have gained increasing attention amongst donors and developing countries since the late 1980s. The last decade has witnessed an expansion of social protection schemes such as cash transfers, health insurance, and pensions in Sub-Saharan Africa. This book focuses on three important sectors of informal work: transport, construction, and micro-trade in Kenya and Tanzania. It will be of interest to academics and practitioners in International Development Studies, Political Economy, and African Studies, as well as development practitioners in both

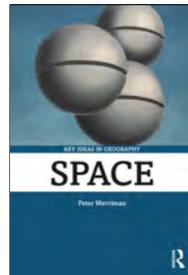

bilateral and multilateral donor organisations.

Space

Peter Merriman, Aberystwyth University, UK

Series: *Key Ideas in Geography*

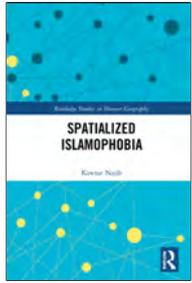

Space is the first accessible text which provides a comprehensive examination of approaches that have crossed between such diverse fields as philosophy, physics, architecture, sociology, anthropology, and geography. It examines the influence of geometry, arithmetic, natural philosophy, empiricism and positivism to the development of spatial thinking, as well as contributions of phenomenologists, existentialists, psychologists, Marxists and post-structuralists to how we occupy, live, structure, and perform spaces and practices of spacing. It will be of central importance to scholars and practitioners working across the arts, humanities, social sciences, and physical sciences.

Spatialized Islamophobia

Kawtar Najib

Series: Routledge Studies in Human Geography

This book demonstrates the spatialized and multi-scalar nature of Islamophobia. It provides ground-breaking insights in recognising the importance of space in the formation of Islamophobic racism. ;

Through the exploration of complementary data, both from existing quantitative databases and directly from victims of Islamophobia, applied in two important European capitals - Paris and London - this book argues that Islamophobia is also a spatialized process that occurs at various interrelated spatial scales.

It will be an important reference for those in the fields of Human Geography, Racial Studies, Religious Studies and Muslim studies.

The Anthropocene

Edited by David R. Butler

This book is devoted to the Anthropocene, the period of unprecedented human impacts on Earth's environmental systems and illustrates how Geographers envision the concept of the Anthropocene. It will be of great value to scholars, researchers and students interested in geography, environmental humanities, environmental studies and anthropology.

The chapters in this book were originally published as a special issue of the journal, *Annals of the American Association of Geographers*.

The City as Action

Rethorizing Urban Studies

Narendar Pani, Professor, National Institute of Advanced Studies, Bengaluru, India

Series: Global Urban Studies

In constructing the urban as a set of interconnected actions, this book presents a less travelled route to understanding the city. It leads to a fresh perspective on several issues central to urban theory, including the uniqueness of a city alongside practices it shares with other urban places.

The Formation of Regional Religious Systems in Greater China

Edited by Jiang Wu, Arizona University, USA

Series: Routledge Spatial Humanities Series

Based on years of data compilation and analysis of religious sites, this book explores the formation of Regional Religious Systems (RRS) in Greater China in unprecedented scope and depth. It addresses quantitatively the enduring historical and contemporary issues of China's deep-rooted regionalism.

The Interstitial Spaces of Urban Sprawl

Geographies of Santiago de Chile's Zwischenstadt

Cristian A. Silva, Queen's University Belfast

Series: Routledge Contemporary Perspectives on Urban Growth, Innovation and Change

This book proposes the idea of interstitial space as a theoretical framework to describe and understand the implications of in-between lands in urban studies, and their profound transformative effects in cities and their urban character. This is the ideal text for scholars of urban planning, strategic spatial planning, landscape planning, urban design, architecture, and other cognate disciplines as well as advanced students in these fields.

The Invention of Disaster

Power and Knowledge in Discourses on Hazard and Vulnerability

JC Gaillard, University of Auckland, NZ.

Series: Routledge Studies in Hazards, Disaster Risk and Climate Change

This theoretical contribution argues that the domination of Western knowledge in disaster scholarship has allowed for normative policies and practices of disaster risk reduction to be imposed all over the world. It takes a postcolonial approach to challenge power relations between researchers and deconstruct concepts, discourses and forms of governments inherited from the Enlightenment. The book ultimately encourages the emergence of more diverse worldviews and ways of knowing for both studying disasters and informing policy and practice of disaster risk reduction. Such pluralism is essential to better reflect local realities of what disasters actually are around the world.

The Routledge Handbook of Development and Environment

Edited by **Brent McCusker, Waqar Ahmed, Maano Ramutsindela**, University of Cape Town, South Africa and **Patricia Solís**

Series: *Routledge International Handbooks*

The handbook seeks to illuminate the key concepts in the study of development-environment through showcasing some of the Majoritarian (formerly "Developing") world's emerging scholars in order to explore theoretical connections through critical/radical theory, "small" theory, various conceptual frameworks, and non-western and subaltern viewpoints. The book is primarily intended for scholars and graduate students in geography, environmental studies, and development studies

for whom it will provide an invaluable and up-to-date guide to current thinking across the range of disciplines, which converge in the study of development and environment.

The Routledge Handbook of Environmental Movements

Edited by **Maria Grasso**, The University of Sheffield, UK, and **Marco Giugni**, University of Geneva, Switzerland

Series: *Routledge International Handbooks*

This handbook provides readers with up-to-date knowledge on environmental movements, activism, and is a reference point for international work in the field. It offers an assessment of environmental movements in different regions of the world, macrostructural conditions and processes underlying their mobilization, the microstructural and social-psychological dimensions of environmental movements and activism, current trends as well as prospects for environmental movements and social change. The handbook is an essential guide and reference

point not only for researchers but also for undergraduate and graduate teaching and for policymakers and activists.

The Routledge Handbook of Global Development

Edited by **Kearrin Sims, Nicola Banks, Susan Engel, Paul Hodge, Jonathan Makuwira, Naohiro Nakamura, Jonathan Rigg**, University of Bristol, UK, **Albert Salamanca** and **Pichamon Yeophantong**

Series: *Routledge International Handbooks*

This Handbook provides a comprehensive analysis of some of the world's most pressing global development challenges – including how they may be better understood and addressed through innovative practices and approaches to learning and teaching. Featuring 60 contributions from leading academics and practitioners, the handbook demonstrates that global development challenges are to be found in the global 'North'

as much as the 'South'. It will serve as a valuable resource for students and scholars across multiple disciplines including Development Studies, Anthropology, Geography, Global Studies, Indigenous and Postcolonial Studies, Political Science, and Urban Studies.

The Routledge Handbook on Ecosocialism

Edited by **Leigh Brownhill**, McGill University, Canada, **Salvatore Engel-Di Mauro**, **Terran Giacomini**, **Ana Isla**, **Michael Löwy** and **Terisa E. Turner**

Series: *Routledge International Handbooks*

Building upon the classical works that have propelled and shaped ecosocialist thinking and action and more recent political developments on the ground, the volume will provide a reference point for international work in the field, both directly political and academic. The Handbook is an essential up-to-date guide and reference not only for researchers, but also for undergraduate and graduate students in geography,

environmental studies, development studies, sociology and political science, as well as for policymakers and activists, providing detailed but accessible overviews of the complex, varied dimensions of ecosocialism.

Transdisciplinary Thinking from the Global South

Whose Problems, Whose Solutions?

Edited by **Juan Carlos Finck Carrales** and **Julia Suárez-Krabbe**

Series: *Routledge Research on Decoloniality and New Postcolonialisms*

This book promotes constructive and nuanced transdisciplinary understandings of some of the critical problems that we face on a global scale today by thinking with and from the Global South. It is engaged in transmodernizing, pluriversalizing, decolonizing, queering, and/or posthumanizing thinking and practice.

Twin Cities across Five Continents

Interactions and Tensions on Urban Borders

Edited by **Ekaterina Mikhailova** and **John Garrard**

Series: *Global Urban Studies*

This international collection provides a comprehensive overview of twin cities in different circumstances – from the emergent to the recently amalgamated, on 'soft' and 'hard' borders, with post-colonial heritage, in post-conflict environments and under strain. It is a valuable resource for researchers in the fields of anthropology, history, geography, urban studies, border studies, international relations and global development as well as for students in these disciplines.

Urban Marathons

Rhythms, Places, Mobilities

Jonas Larsen

This original social-science text approaches marathon running as an everyday practice and a designed event, to draw upon, and contribute to the literature on practice theory, urban events, rhythm analysis and mobility. It bridges sport studies and discussions within sociology and geography about practice, movement and the city. It will appeal to postgraduate students and scholars in sport studies, geography, and sociology interested in running, active mobility and ethnography, as well as tourism and urban events. The book will also appeal to general readers with an interest in marathon running.

Why Vulnerability Still Matters

The Politics of Disaster Risk Creation

Edited by Greg Bankoff and Dorothea Hilhorst

Series: Routledge Studies in Hazards, Disaster Risk and Climate Change

We think vulnerability still matters when considering how people are put at risk from hazards and this book shows why in a series of thematic chapters and case studies written by eminent disaster studies scholars that deal with the politics of disaster risk creation: precarity, conflict, and climate change. The chapters in this book highlight different aspects of vulnerability and disaster risk creation, placing the stress rightly on what causes disasters and explaining the politics of how they are created through a combination of human interference with natural processes, the social production of vulnerability, and the neglect of response capacities.

Young People, Wellbeing and Sustainable Arctic Communities

Edited by Florian Stammler and Reetta Toivanen

Series: Routledge Research in Polar Regions

This book introduces the Arctic as a place for opportunities, the realization of life trajectories and young people's images of home. Rooted in anthropology, the chapters also feature contributions from the fields of sociology, geography, sustainability science, legal studies and political science, with case studies from three continents (the Asian, European and Canadian Arctic).
