

Religion

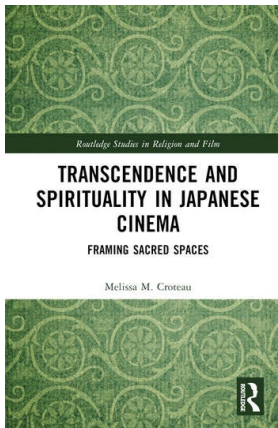

(9780367142513) is an outstanding, comprehensive and lively introduction to this complex Christian denomination. It includes over sixty chapters by a distinguished international and interdisciplinary team of contributors, covering key themes such as global Quaker activity, significant Quaker movements, biographies of key religious figures, important organisations, pacifism, politics, the abolition of slavery, education, industry, human rights, racism, refugees, gender, disability, sexuality and environmentalism

is a ground-breaking volume exploring two sides of religion: the ways in which it contributes to violence against women and girls (VAWG), and the ways it counters it. Combining cutting-edge research with case studies and pragmatic recommendations for academics, policy makers, and practitioners, it has been described as 'clear, pedagogical and full of real voices', and 'not only a must-read, but a roadmap for women's dignity'

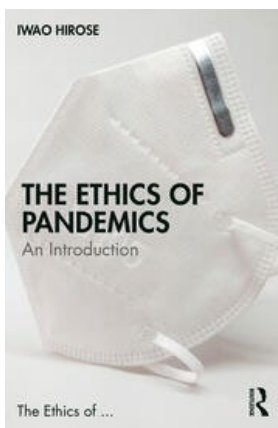

reflects on developments in the field over the past two decades and highlights its contributions to emerging conversations since publication of the first edition. Exploring how religion, horror, and the monstrous are closely intertwined, this monstrously provocative book demonstrates that religion is never more fascinating than when it is most disturbing'

[Transcendence and Spirituality in Japanese Cinema](#) explores significant representations of Shinto and Buddhist sacred space, spiritual symbols, and religious concepts that are embedded in the secular framework of Japanese films aimed at general audiences in Japan and globally. It moves beyond conventional notions of transcendental style and essentialized approaches to the multivalent richness of Japanese aesthetics. The book is relevant to scholars of religion and film, and others with an interest in Japanese cinema, cinematic aesthetics, and East Asian religions.

The Internet and Philosophy of Science, ed. by Wenceslao J. Gonzalez, analyzes the Internet from the perspective of the philosophy of science. There are three layers to the Internet that require philosophical attention: (1) the technological infrastructure, (2) the Web, and (3) cloud computing, along with apps and mobile Internet. The chapters in this volume focus on the technological aspects and social dimension of the Internet from the viewpoint of structural and dynamic complexity.
