# Medicine & Veterinary Medicine Catalogue 2023

January - June

New and Forthcoming Titles

# Welcome

Welcome to the January - June 2023 Medicine and Veterinary Medicine Catalogue.

The Medicine collection is divided into clinical medicine, general reference, medical education, revision guides, and surgery. Publications span the full spectrum of internal medical and surgical specialties, and cover anaesthesiology, paediatrics, radiology, obstetrics, gynaecology, and pathology. Revision guides support medical students and trainee doctors through qualifying examinations, while general references are of interest throughout professional practice.

We welcome your feedback on our publishing programme, so please do not hesitate to get in touch – whether you want to read, write, review, adapt or buy, we want to hear from you, so please visit our website below or please contact your local sales representative for more information.

## Coronary Interventions Using OCT Imaging

A Case- Based Approach

Edited by **Sridhar Kasturi**, Sunshine Hospitals, Hyderabad, India

This comprehensive text takes a case-based approach to OCT image interpretation during Coronary Interventions. It guides the interventional cardiologist/radiologist to understand plaque morphology and its modification strategies by optimizing Percutaneous Coronary Interventions (PCI) results with high resolution illustrations and videos. Using evidence-based medicine from recent scientific guidelines and publications, this book highlights the latest uses of intravascular imaging procedure during coronary interventions. It emphasises on understanding of the latest literature and OCT criteria for

assessing lesions and post PCI optimization based on clinical trials and case reports.

4th Edition

## Echocardiography

A Practical Guide for Reporting and Interpretation

**John Chambers**, Guy's and St Thomas' Hospitals, London, UK, **Sandeep S. Hothi**, University of Birmingham, UK and **Camelia Demetrescu**, Guy's and St Thomas' Hospitals, London, UK

This book sets echocardiography within a routine clinical context. It aims to synthesize guidelines into a pragmatic clinical approach to real patients providing a step-by-step guide to performing, reporting and interpreting a study. Written with the imagination of the calm voice of a senior echocardiographer teaching a junior, this edition has been extensively revised with an expansion of sections on acute, intensive care and emergency medicine. COVID-19 has necessitated limiting exposure of both patient and operator to infection and also caused a huge increase in waiting lists. It also highlights the importance of collaboration between clinicians and echocardiographers.

## Handbook of Cardiac Critical Care and Anaesthesia

Edited by **Sunandan Sikdar**, Narayana Multispeciality Hospital, Kolkata, India

This book provides clinical tips on management of catastrophic emergencies that are regularly faced by critical care and acute care cardiologists in resource-limited settings. Based on the current guidelines, it explores the evaluation of the patient, followed by its treatment methodology. It highlights the beneficial effects of the use of cardiac drugs during an emergency. There is also a special section on preoperative evaluation and postoperative management of cardiac patients of different subsets. Medicolegal/documentation points have also been discussed where relevant. It is useful as a ready

reference for physicians, anaesthetists and cardiologists.

## Atlas of Clinical Dermatology in Coloured Skin

A Morphological Approach

Edited by P C Das and Piyush Kumar

This atlas of dermatology has a unique clinical orientation and lays emphasis on morphology. The disease entities are arranged according to the morphology of lesions, not etiologically. This pattern of placement is more useful for both teaching and learning and serves as an important aid in making a diagnosis as this approach is based on the way patients present themselves in out-patient departments. The key diagnostic clinical pointers too have been provided with images which helps one suspect the diagnosis and exclude clinical differentials. This atlas would serve as a ready reckoner for residents and practitioners.

## Essentials for Aesthetic Dermatology in Ethnic Skin

Practice and Procedure

Edited by Mukta Sachdev, Manipal Hospitals, Bangalore and Niti Khunger, VM Medical College, Safdarjang Hospital, New Delhi, India

This book focusses on creating awareness and detailing the nuances of aesthetic dermatology practice in skin of colour. It highlights practical considerations in pre/intra/post procedure care with emphasis on patient selection for aesthetic procedures and the associated challenges involved in real-time practice. It aims to cater to audiences of countries with both high and low dark skin patient population, as often the clinicians have limited experience in treating this group. Numerous topics are explored through case-based discussions and practical tips. This is a practical ready reference manual for a cosmetic dermatologist dealing with darker skin.

**Anatomy**

Regional, Surgical, and Applied

Edited by **Qassim F. Baker**, Royal College of Surgeons of England, UK and **Philip J. Addis**, St George's University of London, UK

An easy-to-read book written by students for students, edited by senior clinicians and anatomy academics, with contributions from leading anatomists and clinicians. Anatomical facts are correlated with clinical settings, especially medical emergencies, and important points are highlighted with clear learning points. The clear text is supplemented by diagrams and images, which form an essential part of this book. It covers the students' learning objectives in undergraduate anatomy curricula and helps in

preparing them for practical and written exams. It forms a solid foundation for future clinical exams based on the knowledge of anatomical facts in a clinical setting.

**Child Development with the D-score**

Edited by **Stef van Buuren** and **Iris Eekhout**

Children learn to walk, speak, and think at an astonishing pace. The D-score presents a unified framework that places children and their developmental milestones from different tools onto the same scale, enabling comparisons in child development across populations, groups and individuals. This pioneering text explains why we need the D-score, how we construct it, and how we calculate it. It will be of interest not just to professionals in child development, but also to policymakers in international settings and to data scientists.

## Making Sense of Sleep Medicine

A Hands-On Guide

Edited by **Karuna Datta**, Armed Forces Medical College, Pune, India and **Deepak Shrivastava**, UC Davis School of Medicine, Sacramento, California, USA

Series: *Making Sense of*

This is a practical and patient-complaint focused handbook, directed to motivate non-sleep experts and beginners in sleep medicine and technology. This book provides a basic review of the area of sleep, identifies some common patient presentations and illustrates the types of investigations that should be requested. With sleep and breathing problems being so common and affecting many other chronic clinical conditions, it is important that primary care and other general physicians

as well as allied health practitioners have a greater appreciation of this area. This text is a valuable "go-to" handbook for the occasional "sleep" practitioner to refer to.

## Mechanical Lumbosacral Spine Pain

Anatomy, Histology and Imaging

**Lynton GF Giles**, James Cook University, Queensland, Australia

This book addresses an extremely prevalent medical problem: low back pain. It is not a general anatomy book, but it relates specifically to the lumbosacral spine, encompassing anatomy, histology, histopathology, and imaging all in one volume. For students, the text incrementally introduces them to lumbosacral anatomy terms and scientific knowledge by using photographs of gross and histological sections of the spine, as well as schematic drawings and images, in preparation for clinical practice. It answers many questions about the pathogenesis of low back pain, helpful for clinicians, both for treatment decisions

and for counselling patients.

5th Edition

## The Care of the Older Person

Edited by Ronald Caplan, Weill Medical College of Cornell University, USA

This fifth edition brings to you updated and revised content, built on the basic understanding that medicine does not work in a vacuum, but rather alongside other disciplines to provide the environment for a healthy and fulfilling long life. Edited by alumni and senior faculty at McGill University, with international contributions, this book advocates the achievement of better, longer, satisfying, and more productive lives for older persons. A helpful resource for physicians, professional caregivers, therapists, students, and residents in medical and nursing disciplines, who care for our burgeoning older population, and

need to know what to look for and when to consult specialists.

## Which Treatment Is Best? Spoof or Proof?

Teddy Bader, University of Oklahoma, USA

*Which Medical Treatment is Best? Spoof or Proof?* explains the best scientific evidence for any treatment - the randomized controlled trial. This book begins with rotten humors as the source for all diseases. The reader is guided through serious attempts in history to treat disease, but which now seem amusing. The story ends with the randomized controlled trial and how to interpret it. The text will help students and clinicians understand this universal language of clinical research worldwide.

**Case Studies in Infectious Disease**

Peter Lydyard, Michael Cole, John Holton, Will Irving, Nino Porakishvili, University of Westminster, London, UK, Pradhib Venkatesan and Kate Ward

This book presents forty case studies, with a further eight online, featuring the most important human infectious diseases worldwide. Written for students of microbiology and medicine this book describes, through five core sets of questions, the natural history of infection from point of entry of the pathogen through pathogenesis, followed by the clinical presentation, diagnosis and treatment.

This standardised approach provides the reader with a logical basis for understanding these diverse and medically important organisms and diseases, fully integrating microbiology and immunology throughout.

A Practical Guide to Diagnosis and Management

Edited by Prasanta Raghav Mohapatra, AIIMS, Bhubaneswar, India

Melioidosis is an endemic tropical disease and is fast becoming an emerging global concern. Its clinical mimicry with several other common diseases has made its diagnosis and treatment difficult. This book identifies a gap in the literature and represents the management and diagnosis of this fatal but curable disease. It provides detailed coverage of its history, epidemiology, the latency of the agent, pathogenesis, manifestations, clinical clues for detection, microbiological diagnosis, treatment, prevention, and environmental aspects. This book is for clinicians, infectious disease specialists, microbiologists, and public health professionals, in countries where melioidosis is endemic.

**Flow Cytometry in Neoplastic Hematology**

Morphologic-Immunophenotypic-Genetic Correlation

**Wojciech Gorczyca**, Hematopathologist, Bioreference Laboratories, Elmwood Park, NJ, USA; Regional Cancer Care Associates, Hackensack, NJ, USA

This fourth edition presents an updated and expanded text and illustrations to reflect continued morphologic, immunophenotypic, and especially molecular advances in the field of neoplastic hematology, mostly due to the rapidly expanding application of next-generation sequencing. Those advances not only allow a more reliable diagnosis of the majority of tumors and identification of early changes such as monoclonal B-cell lymphocytosis or clonal hematopoiesis of indeterminate potential (CHIP), but also in many cases identify mutations or

phenotypic changes in tumors that can be targeted by mutation-specific or antigen-specific drugs.

**Applied Sociology of Health and Illness**

A Problem-Based Learning Approach

Costas S. Constantinou

This popular and accessible text continues to cover the basic principles of the sociology of health and illness in an eminently readable way. This fully revised second edition has been inspired, informed and reviewed by medical students. By creatively employing a problem-based learning approach, the book examines commonly covered topics integrating underlying principles and research findings through real-life stories. The book investigates the relevance of sociology and considers a new direction - one that places sociology in the context of healthcare settings, making the topic more realistic, useful and memorable.

Learning from Dr Ockrim and her Glasgow Medical Practice

Kenneth E Collins

This unique work represents the recording and analysis of oral history interviews conducted by the pioneering general practitioner Dr Hetty Ockrim with over seventy patients, as well as office staff and members of the nursing team, between 1989 and 1992 in her former practice in the Ibrox/Govan areas of Glasgow, places of significant socio-economic deprivation. The book showhow oral history can provide an understanding of health care more broadly, key at a time when social inequality is once again widening in many regions.

Mechanisms of Disease

Mark F Wiser

Biology is central to our understanding of health and disease and to the development of treatments, so its critical that health professionals have a solid grounding in the pathogenesis and mechanisms of disease processes. This new textbook draws these topics together, providing an accessible introduction across four central disciplines - basic biology, non-infectious disease, infectious disease, and biotechnology.

Enhanced with plentiful illustrations, *Biology for the Health Sciences* is an essential companion for any student of the health sciences and for biological science students studying the causes

of disease as part of a wider course.

Richard Baker

Population health management is being increasingly adopted by health systems yet the importance of primary health care in influencing population mortality and the mechanisms that explain it are not well understood. Too often, primary health care is regarded as a service for minor health problems and for managing access to secondary care. This limited view is no longer tenable and it is time to be much more ambitious about the place of primary health care in health systems worldwide.

*Primary Health Care and Population Mortality* fulfils this need.

An Exemplar for Practice in Resource Limited Settings

Edited by **Mackfallen G. Anasel**, Mzumbe University, Tanzania, **Ntuli A. Kapologwe**, Regional Administration and Local Government Authorities, Tanzania and **Albino Kalolo**, St. Francis University, Ifakara, Tanzania

Good leadership and governance at all levels of the healthcare system is necessary for better performance of the system and health outcomes. Lack of good leadership and governance practices can lead to misuse of health system inputs such as human resources, health commodities and financial resources hence lowering the quality of services delivered. Thus, this guide was developed through collaborative efforts envisioned to respond to the needs of improving good governance practices at the primary healthcare level in resource-limited healthcare

systems.

## Reflections from the Covid-19 Frontline

A Personal Diary

Ash Subramanian and Jenny Subramanian

At the Frontline of Covid-19 is an emotional account of the first Covid lockdown told by upbeat breast surgeon consultant, Ash, as he admits his struggle to adapt to pandemic life. From new equipment, frequent process shuffling, and heroes within the hospital, Ash reflects on his tales from the NHS frontline of the Covid response. With an entwined narrative from his wife, Jenny, who battles to preserve her hairdressing business during the pandemic, the two give an open account of family life as they navigate 'staying safe' during an unprecedented time.

## Rare Lung Diseases

A Comprehensive Clinical Guide to Diagnosis and Management

Edited by **Sujith V. Cherian**, University of Texas Health-McGovern Medical School, Houston, Texas, USA and **Anupam Kumar**, Baylor College of Medicine, Houston, Texas, USA

This book aims to be a complete guide to diagnose, manage and treat rare lung diseases encountered by practising pulmonologists and trainees. It extensively covers the "more common" of the rare lung diseases, categorising them based on developmental lung anomalies in adults, airway disorders, diffuse parenchymal lung diseases, neoplasms, rare vascular disorders and other miscellaneous conditions. This

comprehensive review facilitates the study and understanding of this complex and diverse set of disorders, focussing on differential diagnosis, evidence-based discussions of management algorithms, and thoughtful analysis of treatment options.

**Imaging for Students**

**Craig Hacking**, UQ School of Medicine, Australia and **David Lisle**, Retd., UQ School of Medicine, Australia

Imaging for Students delivers step-by-step guidance to the range of imaging techniques available, providing a clear explanation of how each imaging modality actually works, and including information on the associated risks and hazards. Throughout, the importance of patient preparation and post-procedure observation is emphasized. Taking information from evidence-based studies and published guidelines, in line with current clinical practice, the book takes a highly logical approach to the investigation of clinical scenarios, where possible

indicating the "best first test"—vital to both appropriate clinical and cost-effective decision-making.

**Morphodynamic Imaging in Achalasia**

Edited by **Giovanni Fontanella**

This book approaches the imaging of achalasia with new pathophysiological assumptions in mind, coming from the Chicago Classification of Manometric diagnosis. Using modern x-ray technology, the authors have developed a schematic and simple approach to detection, diagnosis, and patient stadiation and prognostic stratification, for radiologists, clinicians, and students. It serves as a useful guide to structured and comprehensive reporting of barium swallows. The book allows radiologists to comprehensively understand achalasia from anatomic, pathophysiologic, therapeutic points of view and empowers readers to diagnose and define the exact achalasia

subtype in each patient.

## Climate Change and Animal Health

Edited by **Craig Stephen**, McEachran Institute, Canada and **Colleen Duncan**, Colorado State Univ.

Series: *CRC One Health One Welfare*

This benchmark publication brings together information on the current and anticipated effects of climate change on animal health. It empowers educators, managers, practitioners, and researchers by providing evidence, experience, and opinions on what we need to do to prepare for, and cope with, the largest threat ever to have faced animals on this planet. After introducing animal health in a climate change context, chapters look at specific animal health impacts arising from climate change. The book concludes with suggestions on teachable and actionable ideas that could be used to mobilize concepts

provided into education or advocacy.

## Concise Textbook of Equine Clinical Practice Book 1

Lameness

Antonio Cruz, Royal College of Vet. Surgeons, **Graham Munroe**, Cambridge Veterinary School and **Michael Schramme**, Royal College of Vet. Surgeons

This concise, practical text covers the essential information veterinary students need to succeed in Equine practice, focussing on lameness. Written for an international readership, the book conveys the core information in an easily digestible, precise form with extensive use of bullet-points, lists, protocols and extensive illustration (over 650 full colour, high quality photographs and radiographs). Part of a fur-book series that extracts key information from Munroe's *Equine Surgery, Reproduction and Medicine*, the book distils best practice in a logical clinical-based approach. The spiralbound format allows the book to lie open during practice.
