Card-Based Control Systems for a Lean Work Design

The Fundamentals of Kanban, ConWIP, POLCA, and COBACABANA

Edited by **Matthias Thurer**, Jinan University, Zhuhai, Guangdong, People's Republic of China, **Mark Stevenson**, Lancaster University, United Kingdom and **Charles Protzman**, Business Improvement Group, LLC., Towson, Maryland, USA

This book takes a different approach than others on card-based control systems—as it starts with an introduction to the control *problem*, instead of the control *solution*. It outlines how the problems encountered in typical manufacturing shops and service providers can be characterized, which allows for improved problem diagnosis. In addition to the "traditional" card-based control systems, this is the first book that discusses control of balance by card-based navigation (COBACABANA), a

system developed for high-variety shops producing made-to-order, customized products.

Flexible Work

Designing our Healthier Future Lives

Edited by **Sarah H. Norgate** and **Cary L. Cooper**

Series: Current Issues in Work and Organizational Psychology

This book examines flexible working from a psychological perspective and presents empirical research evidence to address what forms of flexible working there are and how they are evolving. At a time when business leaders are tackling the economic and social costs of presenteeism, the book explores the potential of innovative models of flexible working. In this way, it contributes to advances in understanding of productivity through increasing knowledge about parameters pivotal to the health context of the productivity debate. Each of the main chapters ends with recommendations making this essential

reading for students, academics and professionals interested in flexible work.

Flexible Workers

Labour, Regulation and the Political Economy of the Stripping Industry

Edited by **Teela Sanders**, University of Leeds, UK and **Kate Hardy**, University of Leeds, UK

Series: Routledge Studies in Crime and Society

Lap dancing has become the focus of many important contemporary debates about gender, work and sexuality in recent times. This new book from Kate Hardy and Teela Sanders moves away from the tradition of exploring gender and intimacy in relationships between dancers and customers, in order to examine the official and internal regulation of the industry, the management of clubs, and the labour supply and working conditions of dancers.

Flexible Working in Food Retailing

A Comparison Between France, Germany, Great Britain and Japan

Edited by **Christophe Baret**, **Steffen Lehndorff**, Institut Arbeit und Technik, Germany and **Leigh Sparks**

Series: Routledge Studies in Retailing

This book makes use of a four country research programme, covering France, Germany, Great Britain and Japan. Investigations and interviews at store, company and individual levels paint a picture of working times in the sector and in each of the countries. The volume provides some explanations for national differences as well as the similarities, supply and demand issues, as well as social backgrounds.

Flexible Working in Organisations

A Research Overview

Edited by **Clare Kelliher**, Cranfield University, UK and **Lilian M. de Menezes**, City University, UK

Series: State of the Art in Business Research

The transformation of working environments in the digital age has enabled increased flexibility for employers and employees. The phenomenon of flexible working can be beneficial for both organizations and employees, but debate and research continues into the implementation and outcomes of flexible working practices. This book provides an expert overview of the empirical evidence and offers critical commentary on the state of knowledge in the field of flexible working and new forms of work.

The Independent Professional's Roadmap to Self-Employment Success

Edited by **Katy Tynan**, Safety Partners, Inc., Bedford, Massachusetts, USA

The full-time employee, the staple of the US workplace, is becoming an endangered species. We are on the brink of a seismic shift in the employer/employee relationship that will redefine the nature of jobs and careers. This book describes what's driving this change and includes a pragmatic action plan for professionals who wish to survive the challenge of how to be successful in this new skills marketplace.

Managing the Flexible Workforce

Richard Pettinger

The average workforce today is far different to that of a few years ago. Companies now employ more freelancers and temporary staff, while there is increased job-sharing and sub-contracting, not to mention more staff working from home. This brings with it its own particular set of problems for managers. Here, Richard Pettinger looks at the changing employment situation today and outlines what the flexible workforce is, what flexible working is and how to manage both successfully.

Smart Working

Creating the Next Wave

Anne Marie McEwan

It is more possible than ever to influence and shape our working environments, our experience of work and each other. Business leaders who set the conditions and create engaging, meaningful work through organisational design and use of the knowledge and creative potential of their workforces are engaging in smart working. In *Smart Working: Creating the Next Wave*, Anne Marie McEwan explains how smart working is more than just flexible and mobile working. It is about flexibility and autonomy - how people work, not just where and when. She argues that systems, working environments and governance are more likely to lead to effective performance if they maximise self-determination

and choice.

Remote Working

David Nickson and Suzy Siddons

Remote Working: linking people and organizations addresses the issues facing management with the advent of telecommuting and helps develop skills needed for successful and effective home working. As more people choose to work from home, the challenges for both the home worker and traditional management increase. The authors focus on developing the right skills to cope with this new environment and stress the importance of knowing what the homeworker needs.

The Organisation of Tomorrow

Mark Van Rijmenam

The Organisation of Tomorrow presents a new model of doing business and explains how big data analytics, blockchain and artificial intelligence force us to rethink existing business models and develop organisations that will be ready for human-machine interactions. This book offers governments, professional services, manufacturing, finance, retail and other industries a clear approach for how to develop products and services that are ready for the 21st century. It is a must-read for every organisation that wants to remain competitive in our fast-changing world.

Smart Flexibility

Moving Smart and Flexible Working from Theory to Practice

Andy Lake

Smart Flexibility: Moving Smart and Flexible Working from Theory to Practice is an engaging and practical management book to help organisations implement Smart Working, and take a business-focused approach to 'Flexible Working'. Written for managers at the leading edge of change, Andy Lake takes a strategic, comprehensive and integrated approach to Smart and Flexible Working. Taking an evidence-based approach, he sets out how to achieve measurable benefits across the Triple Bottom Line. Starting from the underlying principles and the compelling context for change, he takes a pragmatic approach to delivering change in each of the key areas of People (HR), Property and

Technology.

Work Design

A Systematic Approach

Adedeji B. Badiru, Air Force Institute of Technology, Dayton, Ohio, USA and Sharon C. Bommer

Series: *Systems Innovation Book Series*

Work is all around us and permeates everything we do and everyday activities. Not all work is justified, not all work is properly designed, or evaluated accurately, or integrated. A systems model will make work more achievable through better management. Work is defined as a process of performing a defined task or activity, such as research, development, operations, maintenance, repair, assembly, production, and so on. Very little is written on how to design, evaluate, justify, and integrate work. Using a comprehensive systems approach, this

book facilitates a better understanding of work for the purpose of making it more effective and rewarding.

You're the Boss

Growing and Selling a Successful Consulting Firm

Raj Aseervatham, Origin Energy, Sustainable Development and Communities, Brisbane, Queensland, Australia

You're the Boss: Growing and Selling a Successful Consulting Firm is written in a warmly conversational manner, making it accessible to novice consultants as well as seasoned professionals. The book focuses on the creation of a capital asset and independent wealth, not just the mechanics of consulting. Bringing together the experiences and lessons learned from highly successful consulting entrepreneurs, the book provides stories that highlight the lessons in action in the USA, UK, Australia, Asia, and South Africa. The book is segmented into nine distinct lessons charting the journey of a successful consulting firm—from inception to sale.
